### Pushpagiri Research Centre

Pushpagiri Research Centre a branch of Pushpagiri Medical College is located in the heart of Thiruvalla, a scenic town in central Travancore in Kerala. Pushpagiri research centre better known by the acronym is a Scientific and Industrial Research Organization (SIRO) recognized by the Department of Scientific and Industrial Research (DSIR), Ministry of Science & Technology, Government of India. It was initiated in the year 2009 and functions in Pushpagiri Medical College Campus as a central research facility.

PRC conducts and promotes research for post graduates in areas of Science such as Tissue Engineering, Phytochemical research, Molecular Biology, Cell Culture, Microbial Technology, Metabolic disorders, Biochemistry and Nanotechnology. PRC offers a unique, pluralistic and open research culture that is supported by high-end infrastructure and instrument facilities.

PRC provides various facilities for the post graduates to carry out dissertation projects and short term research project. They are mainly:

- Molecular Biology
- Animal handling
- HPLC
- Cell Culture
- Biofilm studies
- Microbial technology and infectious disease lab training

#### Molecular Biology

Molecular Biology lab of Pushpagiri research focuses on the study of biology at a molecular level. Major laboratory techniques carried out in Pushpagiri Research Centre:

1. Genomic DNA/ RNA extraction: Conventional/ Kit based method
2. cDNA synthesis
3. Agarose gel electrophoresis
4. Polymerase Chain reaction- Conventional and Real time PCR
5. Bioinformatics tools for Phylogenetic analysis and primer synthesis

### Animal Handling

Animal house in Pushpagiri Institute of Medical Sciences and Research Centre is established in year 2011. The Institutional Animal Ethics Committee (IAEC) was established in the Institute itself, as per the rules of expansion. The IAEC scrutinizes each project to ensure that it follows ethical guidelines. Animal House conducts various workshops for the graduates, post graduates, PhD candidates, teachers etc. This workshop will cover topics and discussions.

- Ethics Guidelines for carrying out experiments
- Introduction to Animal house environment i.e. infrastructure
- Introduction and nutrition to Laboratory Animals
- Animal handling and restraining technique
- Mode of drug administration
- Collection of blood and segregation of organs
- Dissection and survival surgery
- Pre and post operative care

### HPLC

The Biochemistry Lab at Pushpagiri Institute of Medical Sciences and Research Center (PIMS&RC) is equipped with the latest HPLC facility . Here facilities are given to train individuals on various aspects of HPLC.

### Cell Culture

Cell culture lab in Pushpagiri Research Centre is a well equipped sterile lab with biosafety cabinet, CO2 incubator, inverted microscope, refrigerator and cryocans.

### Biofilm Studies

the Medical Biotechnology Lab (MBL) at Pushpagiri Institute of Medical Sciences and Research Centre (PIMS&RC) is equipped with different biofilm models (both static and dynamic) and assay systems which are most suitable for research studies and product evaluation(s).

PRINCIPAL  
Pushpagiri College of Dental Sciences

Details of biofilm models and assays that established at MBL:

- High throughput biofilm models based on the micro titre plate assay
- Minimum biofilm eradication/inhibition assays (MBEC/MBIC – ASTM E2799)
- Drip flow biofilm reactor (ASTM method E2647)
- Static and continuous flowing systems
- Biofilm inhibition assays (chemical, molecular and microscopic methods)
- Studies on biofilm matrix components
- Gene expression studies on biofilm associated phenotypes

In addition, well established animal house facility gives the opportunity to accommodate in vivo biofilm studies.

#### Microbial technologies and infectious disease lab training

Microbial Technology and Infectious diseases laboratory offers a wide array of microbiological applications for MSc Microbiology, Biotechnology, Medical and Dental postgraduates including bio-degradation experiments, antibacterial and antifungal efficacy testing, and comparison of activities of various dental pastes, resin composites, adhesives and other biomaterials.
