Pushpagiri College of Dental Sciences
Tiruvalla.

CODE OF ETHICS IN RESEARCH

INTRODUCTION

Pushpagiri College of Dental Sciences is committed to promoting and maintaining high standards of integrity and accountability in the conduct of academic research and is keen to embed and endorse a culture of honesty and transparency in all its institutional activities. In undertaking this commitment, the College emphasizes that academic freedom is a core value to be safeguarded and sustained. We are dedicated to ensuring a free academic environment to conduct research, to teach, to speak, publish, subject to the norms and standards of scholarly inquiry. Research and developmental activities create and disseminate new knowledge, promote innovation and motivate better learning and teaching and this has been incorporated in our courses.

Research begins from the first year of admission in graduation and is a part of the post-graduate curriculum. Faculty are also encouraged to participate and/or conduct research individually. As the research work is being conducted at all levels in this institute, the code of ethics in research is an inseparable and integral part to set forth general principles of ethical conduct to guide scholars toward the highest ideals of scholarly research. Grants from various international and national agencies like ICMR, DBT, DST, SERB, NANOMISSION, KSCSTE, Bill & Melinda Gates Foundation, etc. whose funding enables us to provide essential research resources to its scholarly community. The institute abides by the highest standards of integrity in the conduct of academic research and/or support to academic research activities.

PRINCIPLES AND ETHICAL VALUES IN RESEARCH

Academic integrity requires that academic research follows elevated professional standards, including:

Appropriate research design and frameworks

Adheres to high levels of research ethics

Abides by the requirements set out by professional and regulatory research guidance and research ethics frameworks issued in appropriate areas.

Academic integrity is defined in terms of the commitment to the values of honesty, trust, fairness, respect, responsibility, legality, and dissemination.

Honesty: An academic community should advance the quest for truth, knowledge, scholarship, and understanding by requiring intellectual and personal honesty in learning, teaching, and research.

Trust: An academic community should foster a climate of mutual trust to encourage the free exchange of ideas and enable all to reach their highest potential.

Fairness: An academic community should seek to ensure fairness in institutional standards, practices, and procedures as well as fairness in interactions between members of the community.

Respect: An academic community should promote respect among students, staff, and faculty: respect for self, for others, for scholarship and research, for the educational process and intellectual heritage.

Responsibility: An academic community should uphold high standards of conduct in learning, teaching, and research by requiring shared responsibility for promoting academic integrity among all members of the community.

Legality: An academic community should observe valid legal norms related to the conduct and publication of research particularly with copyright, the intellectual property rights of third parties, the terms and conditions regulating access to research resources, and the laws of the land.

Communication: An academic community should seek to make the results of its research as widely and as freely available as possible.

INSTITUTIONAL RESPONSIBILITIES

The principal, the vice principals, the head of departments, and faculty members are responsible for promoting and endorsing a transparent academic environment conducive to the application of high professional and ethical criteria of good practice for academic research. Research guides are expected to create and sustain a climate of mutual co-operation that facilitates the open exchange of ideas and the development of academic

research skills. They are also expected to ensure the provision of appropriate supervision and direction for researchers, following the nature of the individual academic discipline and associated mode of research. The institute is committed to providing appropriate direction to the research along with supervision for researchers. Guides are expected to adhere to the norms during the assessment of research progress, and procedures to resolve problems during research activity.

RESEARCH DATA MANAGEMENT

All original research data on which publications have been or will be based, in some cases samples or materials derived from the ongoing research, should be well-documented and safely archived to keep data from being manipulated and to make data accessible for future reference for a period of time adequate for a given discipline.

RESEARCH PROCEDURES

All research studies should be preceded by the risk and consequences analysis to foresee how research results may affect society and the environment. When applying for research funding, the researchers should formulate realistic goals and make every effort to accomplish them. Special care should be taken in the case of research studies carried out on human subjects. Human dignity and an individual's autonomy must be respected at all costs. All research subjects, living organisms, the environment, or cultural objects, should be handled with respect and care. The health, safety, or welfare of a community or collaborators should not be compromised. Researchers should be aware of the need for balanced management of research funding. In special, justified cases, the confidentiality of data or research findings should be respected by the researchers.

PUBLICATION PRACTICE AND AUTHORSHIP

The institute encourages the publication and dissemination of results of high-quality research. It also expects that researchers will engage in the process of publishing and dissemination of their work responsibly and with an awareness of the consequences of any such dissemination in the wider media. Results should be published in a form appropriate to the academic discipline. The institute requires that all individuals listed as authors accept responsibility for the contents of the publication and can identify their contribution to it. Authors should have

participated sufficiently in the research to take public responsibility for the content. Authorship must be based solely on substantial intellectual contribution to the research. This includes significant contribution in initiating the scientific idea, formulating conceptions, designing research, significant share in data acquisition, in the analysis and interpretations of data, and in drafting the article or revising it critically for intellectual content. Acquisition of funding, provision of technical assistance or materials, the collection of data, general supervision of the research group, by themselves, do not justify authorship. All authors are fully responsible for the content of the publication unless it is specified, they are responsible only for a specific part of the study within their specialty. When listing authors and their affiliations, it is appropriate to mention what was the nature of their contribution to the research. The sequence of authors should be consistent with the existing customs in a given scientific discipline and agreed by all, ideally at the start of the project. Intellectual contributions of others that have influenced the reported research should be appropriately acknowledged. Financial or other types of research support should be properly mentioned and acknowledged. Publication of the same (or substantial parts of the same) work in different journals is acceptable only with the consent of the editors of the journals and where proper reference is made to the first publication. The institute encourages the faculty and students to follow the recommendations of ICJME (International Committee of Medical Journal Editors).

THE ETHICS COMMITTEE

Tasks of the ethics Committee:

To provide advice and guidance to the academic community on all matters of academic research ethics

To advise the academic council on compliance with the 'Code of Ethics in Academic Research' of the various academic activities at the college.

To provide guidance and academic support to scholars on ethical issues in respect of teaching, research, and other academic activities.

To advise the academic council of any policies that may be required concerning accepting funds from particular sponsors of research.

To act as an investigative/consultative body for any disputed matter concerning research ethics and conduct

PEER REVIEW AND ASSESSMENT

Reviewers should not agree to peer review any research, scientific achievements, or research concepts of other scientists when the research falls outside their areas of expertise. Reviewers involved in the review process concerning research projects, publications, scientific achievements, applications for faculty positions in scientific institutions, and other forms of recognition, should withdraw from involvement in the review process if there is any conflict of interests between them and evaluated individuals. Reviewers should provide accurate, objective, substantiated, and justifiable assessments. Reviewers should maintain confidentiality until the manuscript is published. Reviewers and editors shall not make any use of the data or ideas presented in submitted manuscripts without the author's permission.

TRAINING

The academic departments should ensure that all researchers undertake appropriate training in research design, methodology, regulatory and ethics approvals and consents, equipment use, confidentiality, data management, record-keeping, data protection and publication, the appropriate use of licensed research resources, and respect for the intellectual property rights of third parties.

AVOIDING CONFLICT OF INTEREST

There are non-professional relationships between the evaluator and the evaluated, be that individual or institution. There is a connection between a member of the fund granting authority and a person or research unit to which these funds are granted.

STANDARD OPERATING PROCEDURES

CHAPTER -1

**PREPARATION AND IMPLEMENTATION OF STANDARD
OPERATING PROCEDURE**

CHAPTER -1

PREPARATION AND IMPLEMENTATION OF STANDARD OPERATING PROCEDURES

1.0 Purpose

This Standard Operating Procedures (SOP) defines the process for writing, reviewing, distributing, and amending SOPs within the Institutional Ethics Committee (IEC). The SOPs will provide clear, unambiguous instructions to conduct activities of the IEC in accordance with the ICMR guidelines Schedule YII and ICH (International Conference on Harmonization) Good Clinical Practice (GCP).

2.0 Scope

This SOP Chapter covers the procedures of writing, reviewing, distributing, and amending SOPs within the IEC.

Procedure and Responsibilities

The SOP shall be prepared according to the applicable regulatory requirements and it shall be approved by Chairperson of the Ethics Committee. SOP shall be revised time to time to meet the new regulatory requirements. The need of a revision of SOP shall be discussed in the IEC meeting and Chairperson shall appoint SOP writing team to revise the SOP.

The proposal for amendment shall be submitted to the Member Secretary. The proposal for amendment shall be presented to the regular members at a scheduled committee meeting. Only regular members shall vote to accept or reject the proposed amendment. A proposed amendment will be approved by a vote of three-fourths of the members present in a quorum at a scheduled committee meeting, rounded to the next whole number.

It is the responsibility of Chairperson of the IEC to appoint the SOP writing Team to formulate the SOPs. SOP writing team will consist of Member Secretary of IEC, administrative staff and one or two other IEC members

Chapter 1 : Preparation and implementation of standard operating procedures

SOP writing team will prepare the draft SOP. The draft SOPs will be reviewed and approved by the IEC members. SOP writing team will be responsible to amend the SOPs as and when required.

SOPs will be reviewed by the members of IEC. The Chairpersons of IEC will approve the SOPs. The SOPs will then be approved by Head of Institution, as these are SOPs for Institutional Ethics Committee for Research Review.

Approved SOPs will be implemented from the effective date. The Member Secretary will discuss the approved SOPs with the administrative staff and instruct them to implement the SOP accordingly. Training on New SOP will be conducted for all members.

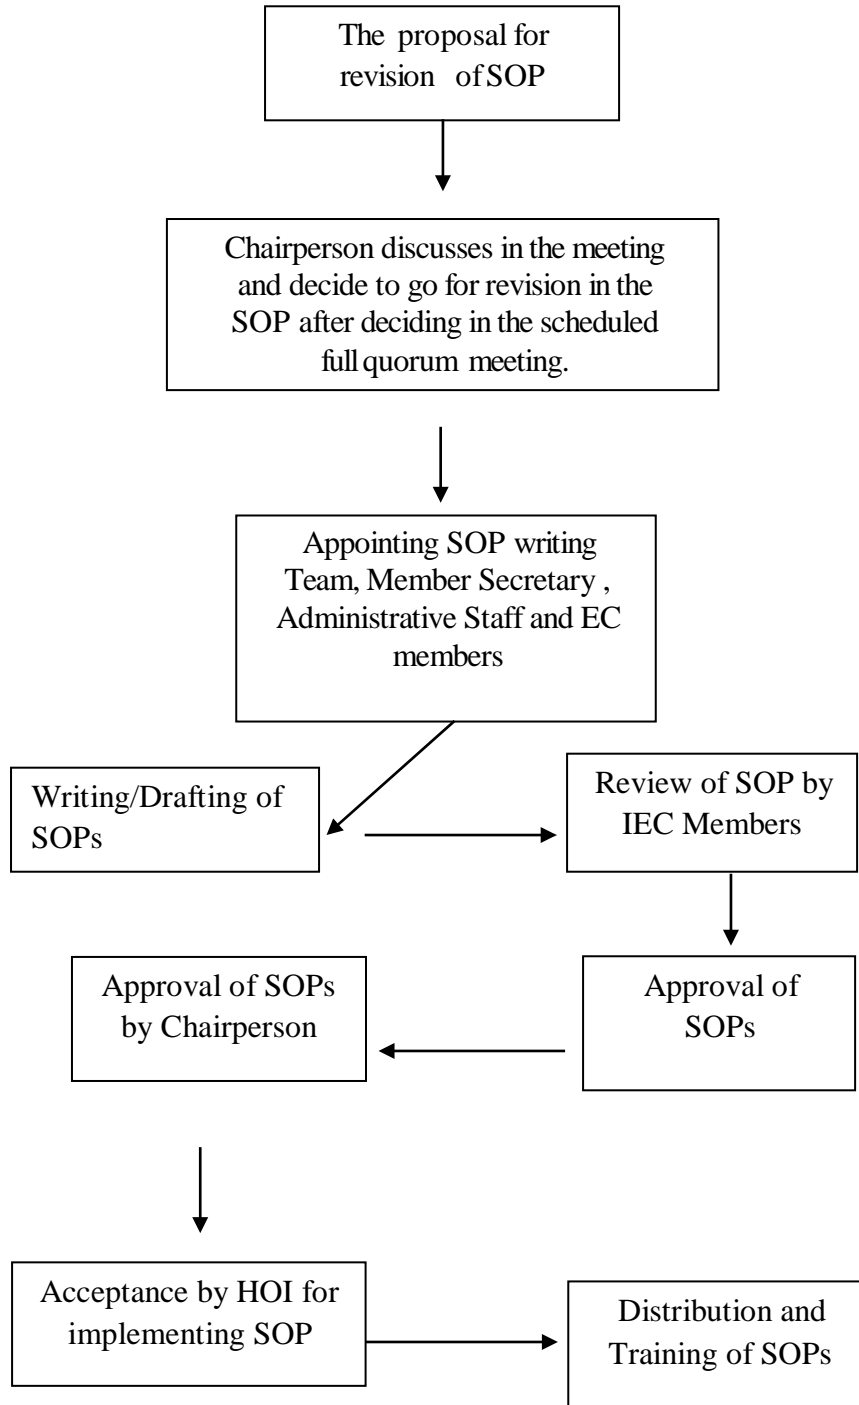

The EC Members will be trained on SOPs annually and whenever there is revision in the SOP. The training records will be maintained by EC

Old SOPs should be retained and clearly marked –superseded and archived in a file by the secretariat. The process of evolution of previous SOPs of the IEC will be documented in a defined format.

STANDARD OPERATING PROCEDURES

Chapter 2

AUTHORITY AND PROCEDURE TO FORM ETHICS
COMMITTEE

CHAPTER 2

AUTHORITY AND PROCEDURE TO FORM ETHICS COMMITTEE

1.0 Purpose

This SOP Chapter shall mention about the authority under which EC is constituted and its procedures for forming Ethics Committee.

2.0 Scope

The SOP Chapter applies to the formation of the EC.

3.0 Authority to constitute IEC

The Head of the institution or person who plays equivalent position from the Institution has the authority for constitution of Ethics Committee. The head of institution will select a Member Secretary from the institution to form Ethics Committee. The Head of Institution and Member Secretary will identify a Chairperson who is not affiliated to the institution by any means. The head of institution will have Memorandum of Understanding with Chairperson. All other EC members are appointed by the Head of the Institution in consultation with chairperson / Member Secretary.

Criteria for selection of members:

- Members are selected in their personal capacities, based on their interest, ethical and/or scientific knowledge and expertise, experience in the domain field and profile.
- The members representing medical scientist and clinicians should have post graduate qualification & adequate experience in their respective fields
- Conflict of interest will be avoided while making appointments, but where unavoidable, there will be transparency with regard to such interests.
- Directors, Head of Institution, Superintendents, Administrative officers who are responsible for business development will not serve as members of IEC.
- New members will be identified according to the requirement

All EC members will receive invitation letter from Head of Institution and all EC Members

Chapter 2 : Authority And Procedure To Form Ethics Committee

will sign acceptance to be part of the study and Confidentiality agreement. The office of Member secretary will act as the administrative office of EC. An updated CV will be collected from the invited members and Medical registration certificates will be collected for the members who are medically qualified.

The Ethics committee will maintain its independence from political, institutional, professional and market influences in the composition, procedures, and decision-making process. The head of Institution would ensure that its Members are competent enough to review a proposal submitted to them and at the same time they are free to express their thoughts and expressions in an unbiased manner.

EC would function in accordance with the Declaration of Helsinki, Good Clinical Practice, Schedule Y and all the applicable national and international guidelines for biomedical research.

The details of the Head of Institution, EC Chairperson and Member Secretary are given below:

- h) Appointment letter

a) Memorandum of Understanding with EC Chairperson

MEMORANDUM OF UNDERSTANDING (MOU)

This MOU made and entered into on -- <Date> (effective date) between Institutional Ethics Committee - <Name and address>(Here after represented as Institution) represented by its Head of the Institute <Name of the HOI>And <Name of the Chairman> having address < enter the address> (here after represented as EC Chairperson).

Institution and EC Chairman hereinafter are individually referred to as -the Partyll and are jointly referred to as -the Partiesll.

Where as

- The Institution is involved in providing healthcare services
- The Ethics committee is the committee functioning in the hospital to review and oversee the biomedical research conducting in the hospital
- Institution appoints EC Chairperson to head the ethics committee and EC Chairman accepts the invitation
- In view of the above, the parties have entered into this MOU on the terms and conditions mentioned herein below:

ROLES AND RESPONSIBILITES OF THE PARTIES

The roles and responsibilities of the parties are as mention below. The parties agree that they shall abide by the roles and responsibilities described and defined hereafter.

EC Chairman

1. Conduct EC Meetings and be accountable for independent and efficient functioning of the committee
2. Ensure active participation of all members (particularly non-affiliated, non-medical/ non-technical) in all discussions and deliberations
3. Ratify minutes of the previous meetings

Chapter 2 : Authority And Procedure To Form Ethics Committee

4. In case of anticipated absence of Chairman at a planned meeting, the Chairman should nominate a committee member as Acting Chairman or the members present may elect an Acting Chairman on the day of the meeting. The acting Chairman should be a non-affiliated person and will have all the powers of the Chairman for that meeting.
5. Seek Conflicts of Interest declaration from members and ensure quorum and fair decision making.
6. Handle complaints against researchers, EC members, conflict of interest issues and requests for use of EC data, etc.
7. To protect the dignity, rights, safety and well-being of the potential research participants.
8. To ensure that universal ethical values and international scientific standards are expressed in terms of local community values and customs.
9. To assist in the development and education of a research community responsive to local health care requirements.
10. For this purpose, EC shall look into the aspects of informed consent process, risk benefit ratio, distribution of burden and benefit and provisions for appropriate compensations wherever required.
11. Provide documents pertaining affiliation, qualification and training.
12. Assessment of EC Members

INSTITUTION

1. Institution to provide an office for the EC.
2. The institution should provide space, infrastructure and staff to the EC for maintaining a full-time secretariat, safe archival of records and conduct of meeting.
3. Institution should allocate reasonable funds for smooth functioning of the EC
4. Receive and review the reports provided by the Chairperson as per standard Operating Procedure.
5. Approve Standard Operating Procedures
6. Provide administrative requirements for the EC
7. Provide adequate honorarium for the participants of the meeting.

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated:20th Nov 2019

2. DURATION

The MOU shall be valid with effect from the effective date and shall continue to be in force for a period of Three years

3. TERMINATION

Either party may terminate this MOU by giving one month written notice to the other party

4. CONFIDENTIALITY

At all-time during the term of this MOU and thereafter each party shall hold in strictest confidence and shall not disclose, use, lecture upon or publish any of the other party's proprietary information, except as such disclosure, use or publication may be required in connection with such party's performance of its obligations under this MOU. The term -proprietary informationll shall mean trade secrets, confidential knowledge, data or any other proprietary information of the party.

5. ARBITRATION

In the event of any dispute arising out of or in connection with this MOU, the parties wish to seek an amicable settlement as per the laws of India and Kerala.

Executed by their duly authorized representatives on the date(s) shown below.

g) Template for Conflict of Interest for members

Agreement on Conflict of Interest

In accordance of the policy of the IEC, I shall not participate in the review, comment or approval of any activity in which I have a conflict of interest, except to provide information as requested by the IEC. The Undersigned will immediately disclose to the Chairperson of the IEC any actual or potential conflict of interest that I may have in relation to any particular proposal submitted for review by the committee, and to abstain from any participation in discussions or recommendations in respect of such proposals.

Whenever I have a conflict of interest, I shall immediately inform the committee not to count me toward a quorum for consensus or voting.

I, have read and I accept the aforementioned terms and conditions as explained in this Agreement.

Signature Date

PUSHPAGIRI RESEARCH CENTRE,

Thiruvalla, Kerala-689101, India

Ph: **0469 2775518**

STANDARD OPERATING PROCEDURES

Chapter 3

CONSTITUTION OF INSTITUTIONAL ETHICS
COMMITTEE

CHAPTER 3

CONSTITUTION OF INSTITUTIONAL ETHICS COMMITTEE

1.0 Purpose

The IEC shall be established to formalize and specify Institution's commitment to the promotion of high scientific and ethical standards in patient care, professional education, clinical research, and community interests.

Ethical Basics for Constitution of EC

- The committee will consist of members who collectively have the qualifications & experience to review & evaluate the scientific, medical & ethical aspects of a proposed research project.
- In evaluating protocols and ethical issues, the IEC is aware of the diversity of laws, culture and practices governing research and medical practices in various countries around the world and especially in India.
- It attempts to inform itself where possible of the requirements & conditions of the various localities where proposed research is being considered.
- The IEC is guided in its reflection, advice & decision by the ethical principles expressed in WMA declaration of Helsinki- Ethical principles for medical research involving Human subjects.
- Adopted by the 18th WMA General Assembly, Helsinki, Finland, June 1964, and amended by the :
 - 29th WMA General Assembly, Tokyo, Japan, October 1975
 - 35th WMA General Assembly, Venice, Italy, October 1983
 - 41st WMA General Assembly, Hong Kong, September 1989
 - 48th WMA General Assembly, Somerset West, Republic of South Africa, October 1996
 - 52nd WMA General Assembly, Edinburgh, Scotland, October 2000
 - 53rd WMA General Assembly, Washington 2002 (Note of clarification on paragraph 29 added)
 - 55th WMA General Assembly, Tokyo 2004 (Note of clarification on paragraph 30 added)

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated:20th Nov 2019

59th WMA General Assembly, Seoul, October 2008

- It makes further reference to the International Ethical Guidelines for e.g.: The Nuremberg Code(1945), Belmont Report (1979), The council for International Organizations of Medical Sciences (CIOMS) International Ethical Guidelines for Biomedical Research involving Human Subjects (Geneva 2002), and the European convention on Human rights & Biomedicine (1997).
- The IEC will ensure that the research protocols submitted by Clinical investigators are sound , scientifically designed, have statistical validity and are conducted according to the parameters of ICH-GCP, Indian GCP, Declaration of Helsinki, ICMR & Schedule Y as local regulatory requirements.
- The IEC is established and functions in accordance with the relevant national law and regulations in force from time to time.

Terms of Reference of IEC

The terms of reference for the IEC are as follows:

- Ensure the highest scientific and ethical standards of research
- Review and approve proposals for clinical, basic or translational research projects (Intra and Extra mural) for scientific and ethical content
- Improve ethical standards and issue guidelines
- To function as a forum to advise the administration in case of any ethical issues that may arise from patients, families or public
- To maintain leadership as a national standard of reference in all fields
- To issue and periodically, update and revise SOP s and guidelines for effective functioning of IEC as and when necessary
- Continuing education in clinical research bioethics and ethical aspects of clinical practice by seminars, workshops and interactive discussions for all categories of staff members including nursing and paramedical staff
- To initiate and commission research studies on ethical aspects of practice.

Responsibilities of IEC

- To protect and safeguard the dignity, rights, safety and well-being of all actual or potential research participants.

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated:20th Nov 2019

- To ensure that the research projects that are carried out are sound in design, have statistical validity and are conducted according to the ICMR, Schedule Y and ICH/GCP guidelines
- To consider the principle of justice, that the benefits and burdens of research be distributed fairly among all groups and classes in society taking into account age, gender, economic status, culture and ethics consideration.
- To provide advice to the researchers on all aspects of the welfare and safety of research participants after ensuring the scientific soundness of the proposed research.
- To ensure the research are conducted under the supervision of trained medical / bio medical persons with the required expertise
- To ensure that research will include, solely, patients or participant who have given voluntary and informed consent
- It may be ensured that no research project shall be / can be started unless Ethics Clearance / Approval is obtained.
- It will review the proposals before start of the studies as well as monitor the research throughout the study until and after completion by examining the annual reports and final reports. The committee will also examine whether all regulatory requirements and laws are complied with or not.

5.0 Composition of IEC:

EC should be Multi-disciplinary and multi- sectorial. There should be adequate representation of age and gender. Preferably 50% Member will be non-affiliated or from the outside the organization. The number of Members in an EC should be between 7 and 15. The EC should have a balance between medical and non-medical members/ Technical and non-technical members depending up on the needs of the institution.

- The Ethics Committee shall have a minimum of seven members from medical, non-medical, scientific and non-scientific areas with at least,
 - i. one lay person;
 - ii. one woman member;
 - iii. one legal expert;

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated: 20th Nov 2019

Chapter 3 : Constitution Of Institutional Ethics Committee

- iv. one independent member from any other related field such as social scientist or representative of non-governmental voluntary agency or philosopher or ethicist or theologian.
- One member of the Ethics Committee who is not affiliated with the institute or organization shall be the Chairperson, and shall be appointed by such institute or organisation.
- One member who is affiliated with the institute or organization shall be appointed as Member Secretary of the Ethics Committee by such Institute or organization.
- The committee shall include at least one member whose primary area of interest or specialisation is non-scientific and at least one member who is independent of the institution.
- The members of the Ethics Committee shall follow the provisions of these rules, Good Clinical Practices Guidelines and other regulatory requirements to safeguard the rights, safety and well-being of trial subjects.
- Every member of the Ethics Committee shall be required to undergo such training and development programmes as may be specified by the Central Licencing Authority from time to time: Provided that any member, who has not successfully completed such training and developmental programmes, shall be disqualified to hold the post of member of the Ethics Committee and shall cease to be a member of such committee.
- The members representing medical scientists and clinicians shall possess at least post graduate qualification in their respective area of specialisation, adequate experience in the respective fields and requisite knowledge and clarity about their role and responsibility as committee members.
- As far as possible, based on the requirement of research area such as Human Immunodeficiency Virus (HIV) or genetic disorder, specific patient group may also be represented in the Ethics Committee.
- No member of an Ethics Committee, having a conflict of interest, shall be involved in the oversight of the clinical trial or bioavailability or bioequivalence study protocol being reviewed by it and all members shall sign a declaration to the effect that there is no conflict of interest.

- While considering an application which involves a conflict of interest of any member of the Ethics Committee, such member may voluntarily withdraw from the Ethics Committee review meeting, by expressing the same in writing, to the Chairperson.
- The details in respect of the conflict of interest of the member shall be duly recorded in the minutes of the meetings of the Ethics Committee.

Roles and Responsibilities of EC Members

Chairperson

Chairperson will be Non affiliated. A well respected person from any background with prior experience of having served/ serving in an EC.

Responsibilities

- Conduct EC Meetings and be accountable for independent and efficient functioning of the committee
- Ensure active participation of all members (particularly non-affiliated, non-medical/ non-technical) in all discussions and deliberations
- Ratify minutes of the previous meetings
- In case of anticipated absence of Chairperson at a planned meeting, the Chairperson should nominate a committee member as Acting Chairperson or the members present may elect an Acting Chairperson on the day of the meeting. The acting Chairperson should be a non-affiliated person and will have all the powers of the Chairperson for that meeting.
- Seek COI declaration from members and ensure quorum and fair decision making.
- Handle complaints against researchers, EC members, conflict of interest issues and requests for use of EC data, etc

Member Secretary

Member Secretary will be affiliated with the institution. Should be a staff member of the institution, Should have knowledge and experience in clinical research and ethics, be motivated and have good communication skills, Should be able to devote adequate time to this activity which should be protected by the institution

Responsibilities

- Organize an effective and efficient procedure for receiving, preparing, circulating and maintaining each proposal for review
- Schedule EC meetings, prepare the agenda and minutes
- Organize EC documentation, communication and archiving
- Ensure training of EC secretariat and EC members
- Ensure SOPs are updated as and when required
- Ensure adherence of EC functioning to the SOPs
- Prepare for and respond to audits and inspections
- Ensure completeness of documentation at the time of receipt and timely inclusion in agenda for EC review.
- Assess the need for expedited review or full review
- Assess the need to obtain prior scientific review, invite independent consultant, patient or community representatives.
- Ensure quorum during the meeting and record discussions and decisions.

Basic Medical Scientist

Medical scientist can be Affiliated/ non-affiliated . He/she should be Non-medical or medical person with qualifications in basic medical sciences, In case of EC reviewing clinical trials with drugs, the basic medical scientist should preferably be a pharmacologist. The representative of Medical scientist category should have postgraduate qualification & adequate experience in their respective fields.

Responsibilities

- Scientific and ethical review with special emphasis on the intervention, benefit-risk analysis, research design, methodology and statistics, continuing review process, SAE, protocol deviation, progress and completion report
- For clinical trials, pharmacologist to review the drug safety and pharmacodynamics

Clinician

He should be affiliated/ non-affiliated Qualifications - Should be individual/s with recognized Post Graduate medical qualification, expertise and training

Responsibilities

- Scientific review of protocols including review of the intervention, benefit-risk analysis, research design, methodology, sample size, site of study and statistics
- Ongoing review of the protocol (SAE, protocol deviation or violation, progress and completion report)
- Review medical care, facility and appropriateness of the principal investigator, provision for medical care, management and compensation.
- Thorough review of protocol, investigators brochure (if applicable) and all other protocol details and submitted documents

Legal expert/s

He should be Affiliated/ non-affiliated with the institution .Should have a basic degree in Law from a recognized university, with experience.

Responsibilities

- Ethical review of the proposal, ICD along with translations, MoU, Clinical Trial Agreement (CTA), regulatory approval, insurance document, other site approvals, researcher's undertaking, protocol specific other permissions, compliance with guidelines etc.
- Interpret and inform EC members about new regulations if any

Social scientist/ philosopher/ ethicist/theologian

Non-affiliated persons with social/ behavioural science/ philosophy/ religious qualification and training and/or expertise and be sensitive to local cultural and moral values. Can be from an NGO involved in health-related activities

Responsibilities

- Ethical review of the proposal, ICD along with the translations.
- Assess impact on community involvement, socio-cultural context, religious or philosophical context, if any

- Serve as a patient/participant/ societal / community representative and bring in ethical and societal concerns.

Lay person(s)

Non-affiliated Literate person from the public or community , Has not pursued a medical science/ health related career in the last 5 years , May be a representative of the community from which the participants are to be drawn , Is aware of the local language, cultural and moral values of the community , Person involved in social and community welfare activities are desirable

Responsibilities

- Ethical review of the proposal, ICD along with translation(s).
- Evaluate benefits and risks from the participant’s perspective and opine whether benefits justify the risks.
- Serve as a patient/participant/ community representative and bring in ethical and societal concerns.
- Assess on societal aspects if any

IEC Secretariat

The Secretariat is composed of the Member Secretary and the administrative supporting staff. The supporting staff consists of staff members of Asirvatham Hospital appointed by the Head of Institution.

The secretariat shall have the following functions:

- Organization of an effective and efficient tracking procedure for each proposal received.
- Preparation, maintenance and distribution of study files.
- Organization of regular IEC meetings. .
- Preparation of the agenda and the minutes of the meetings,
- Maintenance of the IEC records and archives.
- Communication with IEC members and Principal Investigators.
- Arrangement of training for personnel and IEC members.
- Provision of the necessary administrative support for IEC related activities to the Member Secretary, IEC.

Standard operating procedure

- Receipt of IEC processing fees for projects and the issue of official receipts for the same.

The IEC Administrative Staff Roles and Responsibilities

The administrative staff will help the IEC Chairperson and Member Secretary in executing functions of the IEC. Additional staff may be appointed and duties assigned as and when deemed necessary by the IEC. The administrative staff will be appointed by the Head of Institution by formal interview or direct appointment.

- Organizing an effective and efficient tracking procedure for each proposal received.
- Preparing, maintaining and distributing study files.
- Organizing IEC meetings regularly
- Preparing the agenda and minutes of the meetings
- Maintaining IEC records and archives.
- Communicating with IEC members and PIs.
- Arranging training for personnel and IEC members
- Providing necessary administrative support for IEC related activities to the Member Secretary, IEC.
- Receiving IEC processing fees and issuing official receipts for the same.
- Corresponding with the IEC members, external experts and investigators.
- Making the pre and post arrangements of IEC meetings.
- Preparing the agenda and minutes of the IEC meetings.
- Answering queries of the investigators.
- Filing study related documents.
- Archiving and maintaining the study files.
- Preparation for accreditation, Registration and audits
- Training for investigators, key study personnel, IEC members, and IEC staff.
- Participate in the development and subsequent implementation of SOPs
- Developing an effective and efficient tracking procedure

Terms of Membership

- The members are drawn from different specialties to give a multi-sectorial, multidimensional structure. A one page current Curriculum Vitae (CV) will be collected from each member and filed in the administrative file.
- The duration of appointment is initially for a period of 3 years
- At the end of 3 years, the committee will be reconstituted, by the discretion of the Head of the institution
- A member can be replaced in the event of death or long-term assignments outside the country or for any misconduct deemed unfit for a member.
- A member will also be removed if they fail to attend atleast three consecutive meetings unless proper reason for the absence is communicated in advance in writing.
- If a member is found acting code of conduct (or) objectives of the committee, he or she can be removed by 2/3rd majority of the members subject to issue of notice seeking objection which is to be submitted within two weeks on receipt of the notice. On the expiry of two weeks the committees to consider the representation received from the members and decide the action of removal. If the committee is satisfied with the reply, it can drop the action of removal. If not satisfied, the committee can remove the member by passing a resolution to this effective in a meeting to be convened 21 days after sending notice to all the members.
- A member can tender resignation with proper reasons to do so, in writing to the Head of Institution and Chairperson of Ethics committee.
- All members should maintain absolute confidentiality of all discussions during the meeting. A confidentiality agreement will be signed from each member and filed with EC before joining in the EC

Meeting Procedures

- The IEC meetings are held trimonthly. Additional meetings may be held as and When considered necessary.
- The Investigator's team should submit the documents 2 weeks prior to the scheduled meeting to IEC. The applicant is required to submit 5 copies of his / her application letter and copies of the documents.
- The notice of each meeting with the agenda is sent out to the members at least one

Standard operating procedure

Chapter 3 : Constitution Of Institutional Ethics Committee
week before the meeting.

- A quorum is required for all meetings. The project can be approved unanimously or by non-unanimously. When it is approved unanimously, an approval letter will be prepared and signed by chairman and member secretary. If some members are objecting the study to be approved, chairman will take the voting from the members to see the majority and if majority is there the project will be approved. In that case the voting status also will be mentioned in the approval letter.
- Member secretary will prepare the minutes of the meetings and circulated to all the members. The final minutes of the meeting will be kept in the minutes of the meetings file signed by the Chairman.

Quorum Requirement

- In a meeting, atleast five members should be present to meet the quorum requirements; to review and make a written decision on any application. None of the members present in the meeting must not have conflict of interest.

Chapter 3 : Constitution Of Institutional Ethics Committee

- Each Quorum (with a minimum of 5 members) should have following members
 - a. Clinician
 - b. Basic Medical Scientist (Preferably Pharmacologist)
 - c. Legal Expert
 - d. Social Scientist / Representative of Non-Governmental Voluntary Agency
 - e. Lay Person from Community
- If a quorum is not present during the course of the meeting, EC Meeting can be adjourned by Chairperson.
- Chairperson can nominate a member secretary during the absence of Member Secretary
- In the absence of Chairperson EC Members can select a Member as a Chairperson for that meeting. But the selected Member should not be affiliated to the institution
- All types of changes and situations should be documented in the Minutes of meeting of the EC

Policy to prevent conflict of interest

- The ultimate interest of Ethics committee is to prevent conflict of interest.
- It has been recognized that the potential for conflict of interest will always exist, but Chairperson is capable to manage the conflict issues so that the ultimate outcome is the protection of human subjects.
- There should be no conflict of interest.
- The members shall voluntarily withdraw from the Ethics Committee meeting while making a decision on an application which evokes a conflict of interest which may be indicated in writing to the Chairman prior to the review
- Chairperson can also ask the members to declare Conflict of interest during the meeting.
- All members shall sign a declaration on conflict of interest.
- All the declaration regarding conflict of interest should be mentioned in the minutes of Meeting.

Policy regarding Training and Updating IEC members

- All relevant new guidelines to be brought to the attention of the members.

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated:20th Nov 2019

Chapter 3 : Constitution Of Institutional Ethics Committee

- Members should be encouraged to attend national and international training programs in research ethics for maintaining quality in ethical review and to be aware of the latest developments in this area.
- All EC members must be conversant with ICMR Guidelines for Research involving Human Subjects, Schedule Y of Drugs and Cosmetics Act and ICH-GCP guidelines.
- All the members will be given training on the above-mentioned guidelines and rules yearly basis. A training record would be maintained for the same.
- Every new member will get trained on all of the above-mentioned guidelines and rules at the time of appointment.
- When a new rule/ guideline / sop revision has happened, all the members would be trained and training record would be maintained for the same.
- The Trainer will be invited from outside or from within the IEC and background and profile of the trainer will be documented
- All the training records which includes Agenda, Attendance, Pretest, Post test, Feedback forms training materials and Training logs will be maintained in the Training File

Independent Consultants

The IEC may call upon, or establish a standing list of, independent consultants who may provide special expertise to the IEC on proposed research protocols, when the Chairperson / Member secretary or the IEC members determine that a study will involve procedures or information that is not within the area of expertise of the IEC members. These consultants may be specialists in ethical or legal aspects, specific diseases or methodologies (e.g. genetic disorders, stem cell research etc.), or they may be representatives of communities, patients, or special interest groups. These consultants or subject experts cannot vote for a decision.

ANNEXURES

1. Confidentiality Agreement Form for Independent Consultant

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated:20th Nov 2019

Confidentiality Agreement

I, understand that I am allowed to attend the ethics committee meeting as a subject expert/independent consultant. In the course of the meeting of the IEC, some confidential information may be disclosed or discussed. Upon signing this form, I agree to take reasonable measures to keep the information as confidential.

STANDARD OPERATING PROCEDURES

Chapter 4

MANAGEMENT OF SUBMISSION OF APPLICATIONS

CHAPTER 4

MANAGEMENT OF SUBMISSION OF APPLICATIONS

1.0 Purpose

This SOP is designed to describe and act as a guideline for the IEC Secretariat to manage research study submissions.

2.0 Types of research review by Ethics committee And Responsibility

The Ethics Committee will review Clinical Trials (Phase II, Phase III, Phase IV) epidemiological studies, retrospective studies, herbal studies and studies for devices.

It is the responsibility of the IEC secretariat to receive record and distribute the study documents for IEC review.

3.0 Minimum required documents for submission of research project for approval

An application for review of the ethics of proposed biomedical research should be submitted by a qualified applicant responsible for the ethical and scientific conduct of the research. Principal Investigator can submit the documents for IEC for review and approval. All relevant documents should be enclosed with a covering letter and Submission Checklist.

Meeting Frequency of IEC

- The committee will hold regular meetings trimonthly. When there are no research proposals to review, the meeting may be hold less frequently, but no less than once every three months
- The Member Secretary will schedule the meeting either at the time of the previous scheduled meeting or within 2 weeks after new project submission and consult the Chairperson / IEC members to schedule and reconfirm the meeting date.

Submission Requirements

- The application should be submitted two weeks before the EC meeting date.
- 5 number of the hard copies of the proposal; along with the application and documents in prescribed format

- Prescribed fee as per the Fee Structure should be remitted along with the application
- The following list of documents to be submitted by Applicant for review by EC
 - a. Trial Protocol: Submit the latest protocol along with all the amendments mentioning the version no. (s) and date(s).
 - b. Patient Information Sheet and Informed Consent Form: Submit the latest Patient Information Sheet(s) and Informed Consent Form (s) in English and all the applicable vernacular languages mentioning the version no. (s) and date(s).
 - c. AV consent form
 - d. Investigator's Brochure: Submit the latest Investigator's brochure mentioning the version no. (s) and date(s).
 - e. Proposed methods for patient accrual including advertisement if applicable (s) etc. proposed to be used for the purpose.
 - f. Principal Investigator's signed and dated current CV along with medical registration certificate.
 - g. Insurance Policy / Compensation for participation and for serious adverse events occurring during the study participation.
 - h. Investigator's Agreement with the Sponsor.
 - i. Investigator's undertaking, as per Schedule Y – Appendix VII format.
 - j. The Regulatory approval / submission status from sponsor for the conduct of study.
 - k. Description of site facilities using in the study including available emergency facilities
 - l. A description of the process to be used to obtain the informed consent.

Receive submission packages

For the initial review of study, investigators should submit all study related documents to the IEC, two weeks before the next scheduled meeting. The procedure for the receipt of documents are as follows :

- EC Secretariat will review the documents submitted.
- If any missing documents are there EC will inform the applicant to submit the required documents

Chapter 4 : Management Of Submission Of Applications

- If the application is intact, the member secretary will give acknowledgement in the submission letter by signing and stamping for investigator use.
- Each Hard copy of the documents will be distributed to each of the members to their address and soft copy will be mailed to their official email id before 14 days before the EC meeting
- One copy will be stored at EC office which will be labeled as Master copy and this copy will be archived at EC office
- Agenda will be prepared by EC office and distributed to all EC members 7 days prior to the meeting.

STANDARD OPERATING PROCEDURES

Chapter 5

**AGENDA PREPARATION, MEETING PROCEDURES
ETHICAL REVIEW AND PREPARATION OF MINUTES OF
MEETING**

CHAPTER 5

AGENDA PREPARATION, MEETING PROCEDURES ETHICAL REVIEW AND PREPARATION OF MINUTES OF MEETING

1.0 Purpose

The purpose of this Chapter is to elaborate the administrative process and provide instructions on meeting agenda, review, approval, minutes, and communicating the decision to the Principal Investigator.

The IEC shall review and approve, every research study involving human participants and other forms of studies, before the research is initiated. The IEC shall evaluate the scientific rationale, scope, methodology, and the ethical aspects of the study. The committee shall evaluate the possible risks to the participants with proper justification as well as the expected benefits to participants/community. The adequacy of documentation for ensuring privacy & confidentiality shall also be reviewed.

2.0 Scope

This Chapter applies to procedures to conduct the IEC meeting:

3.0 Responsibility

It shall be the responsibility of the respective Member Secretary of IEC and IEC staff to prepare for the IEC meeting.

4.0 Before full board IEC meeting

Prepare the agenda of the IEC meeting. Schedule studies on the agenda on first come first serve basis. No limit is placed on the number of items on the agenda. The number of items is based on available expertise (members and consultants), urgency, order of submission to the IEC and IEC workload.

Preparation of the meeting

- The meeting frequency of IEC will be trimonthly.

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

- Reserve the meeting venue for the IEC meeting on the scheduled meeting date and time. The meeting will be held in the Board room of Hospital, unless otherwise specified. Ensure that the room, equipment (projectors, recorder, etc) and facilities are available in good working conditions
- All original files of studies on the agenda are kept in the meeting room for ready reference before the meeting
- Copies of SOPs, Schedule Y, ICMR guidelines are kept available for ready reference
- Secretariat informs the scheduled meeting date and time to the Principal Investigators.

Element of review

The Meeting will be organized in the institution or facility desired by institution. All the members will be signing the attendance sheet. The prepared Agenda will be followed during the meeting .The quorum requirement and conflict of interest will be ensured by the EC Chairperson before discussing the study by any investigator. The Investigator will present the study. Independent Consultants can also be invited to review and advice on a particular topic where EC doesn't have expertise.

The review and the decision will be done based on the below criteria.

- Scientific design and conduct of the study.
- Examination of predictable risks/harms.
- Examination of potential benefits.
- Procedure for selection of subjects: Exclusion/ Inclusion criteria
- Management of research related injuries, side effects, ADRs.
- Compensation provisions.
- Justification for placebo in control arm, if any.
- Availability of products after the study, if applicable.
- Patient information sheet and informed consent form in local language.
- Protection of privacy and confidentiality.
- Involvement of the community, wherever necessary.
- Plans for data analysis and reporting
- Adherence to all regulatory requirements.

The prefilled Documents review checklists will be discussed with the Investigator by the respective EC members. All the queries will be discussed. EC can be go for two types

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

reviews based on the assessment of documents. The Member Secretary/Secretariat shall screen the proposals for their completeness and depending on the risk involved categorize them into two types, namely expedited review, and full committee review

Expedited Review

Proposals that pose no more than minimal risk may undergo expedited review. Such meetings will be conducted by members meeting quorum including Member Secretary and Chairperson

- Research involving clinical documentation materials that are non-identifiable (data, documents, records) Modification or amendment to an approved protocol including administrative changes or correction of typographical errors
- Review of SAE and due analysis report preparation to be sent to CDSCO within 30 days of occurrence of SAE
- Revised proposals previously approved through expedited review, full review or continuing review of approved proposals
- Minor deviations from originally approved research causing no risk or minimal risk;
- Progress/annual reports where there is no additional risk
- Activity limited to data analysis.

Approval granted through expedited review and the decisions of the SAE must be ratified at the next full committee meeting.

Full Committee review

All research proposals presenting more than minimal risk that are not covered under expedited review should be subjected to full committee review, some examples are;

- Research involving vulnerable populations, even if the risk is minimal;
- Research with minor increase over minimal risk
- Studies involving deception of participants
- Amendments of proposals/related documents (including but not limited to informed consent documents, investigator's brochure, advertisements, recruitment methods, etc.) involving an altered risk;

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

- Major deviations and violations in the protocol;
- Any new information that emerges during the course of the research for deciding whether or not to terminate the study in view of the altered benefit–risk assessment;

Research during emergencies and disasters either through an expedited review/ scheduled or unscheduled full committee meetings. This may be decided by Member Secretary depending on the urgency and need.

Periodic Review

All the approved studies will be reviewed atleast once in 6 months from the day of initial approval of the study to understand the progress of the study. All the investigator will be notified the time frame of periodic review via initial approval letter of the study. Intimation notice will be issued by EC office to investigator. The following summary will be reviewed.

- Number of subjects screened
- Number of subjects randomized
- Number of subjects Drop outs
- Number of subjects withdrawn
- List of SAEs
- List of AE
- List of Protocol Deviation
- List of protocol violation
- Any new information relevant to the study

Annual Review

- Approval may be granted for the entire duration of the proposed research or can be subject to annual review depending on the type of study which will be conveyed to researcher at the time of initial review. The researcher should give annual report and request to continue the study with the documents available in the present form. The EC should review the annual report and if found satisfactory IEC will approve to continue the study.

- The first report shall be submitted within thirty (30) days of completion of the year following the date of the first approval. Subsequent reports will be submitted at one-Year intervals following the first report.
- An EC may decide to reverse its positive decision on a study if it receives information that may adversely affect the benefit-risk assessment.

11.0 Review of Protocol Deviation/ Violation

All Protocol Deviation/Violation/ non-compliance/waiver will have to be notified. All such notifications shall be circulated to IEC members, reviewed & assessed by the committee during the meeting for the seriousness of the deviation / Non-Compliance / Violation with respect to the safety & health aspects of the subjects and the necessary actions shall be taken by the committee accordingly.

Review of Studies involves vulnerable population

The IEC of Pushpagiri Institute of Medical Sciences and Research Centre takes special consideration in protecting the welfare gives special consideration to protecting the welfare of vulnerable subjects such as children, prisoners, fetuses/neonates, pregnant women, and individuals with consent capacity impairment. The IEC carefully considers group characteristics, such as economic, social, physical, and environmental conditions, to ensure that the research incorporates additional safeguards measures for vulnerable subjects. The IEC may require additional safeguard measures to protect potentially vulnerable population. For instance, the IEC may require that the investigator submit each signed informed consent form to the IEC, that someone from the IEC oversee the consent process, or that a waiting period be established between initial contact and enrollment to allow time to allow the subject time for family discussion and query resolution, family discussion and questions. IEC expects to follow the principals laid down in the ICMR-Ethical Guidelines for Biomedical Research on Human Participant.

RESPONSIBILITY:

It is the responsibility of the Chairperson and Member-Secretary of IEC to implement, amend and give training to other members of IEC of this SOP.

PROTOCOL REVIEW PROCESS:

DETAILED INSTRUCTION

For Pregnant Women, Foetuses:

Research involving pregnant women and fetuses should involve the least possible risk. The IEC will document specific findings to minimize the potential for risk or harm to the fetus, and additional attention must be given to the conditions for obtaining informed consent. The IEC will ensure that women are not encouraged to discontinue nursing for the sake of participation in research except in the cases where breast-feeding is harmful to the infant. IEC will also ensure that compensation in terms of supplying supplementary food such a milk formula will be considered in such circumstances. In the event of research related to pre-natal diagnostic techniques, IEC will ensure that such research is limited to detect foetal abnormalities or senetic disorders and not for sex determination.

Research involving Prisoners:

Prisoners may have a limited ability to make truly voluntary and un-coerced decisions about whether or not to participate as research subject.

Children involved as subjects/ participants in Research:

IEC requires special protections for research involving children. Under the regulations, children are persons who have not attained the legal age for consent to treatments or procedures involved in the research under the applicable conducted. The proposed clinical research must fall within one of the four following categories: (i) Clinical Trial not involving Minimal Risk. (ii) Clinical trial involving greater than minimal risk, but presenting the prospect of direct benefits to the individual subjects. (iii) Clinical trial involving greater than minimal risk, yield knowledge that can be generalized about subject's disorder or condition. Clinical trial not otherwise approvable, which presents an opportunity to understand, prevent, or alleviate a serious problem affecting the health and welfare of children. Each category has specific conditions that must be included in their organization Standard Operating Procedures (SOPs) if the institution is involved in human research where children are in the subject population.

Parental/Legally acceptable representative Permission:

The IEC require that adequate provisions are made for solicit the permission of each child's parents or guardian/legally acceptable representative. Where parental permission is to be obtained, the IEC will determine whether permission of one parent is sufficient or whether permission must be obtained from both parents in order for the research to be conducted.

Assent of the Child:

(a) Provisions must also be made in the protocol to obtain the child's assent when the child is capable of giving assent. (b) IEC may determine that the assent of the child is not necessary if and only if all three of the following conditions are satisfied: (i) The research offers the child the possibility of direct benefit. (ii) The benefit is important to the health or well being of the child. (iii) The benefit is available only in the context of the research. IEC will take great care in approving research where the child is suffering from a life-threatening illness with little real chance of therapeutic benefit from the research. IEC will respect the child's refusal to participate in the research and will be cautious in allowing parents/ legally accepted representatives to overrule. IEC requires assent form is tailored for the child, with respect to his or her level of understanding.

Clinical trial involving Decisionally Impaired Subjects:

IEC will consider selection issues, privacy and confidentiality, coercion and undue influence, and risk-benefit analysis. Additional safeguards must be considered by the IEC to protect these subjects.

Decision-making

The committee will give its opinion on the project in writing in one of the following ways:

Members will discuss the various issues before arriving at a consensus decision.

- A meeting will be considered valid only if the quorum is fulfilled. This should be maintained throughout the meeting and at the time of decision making. Decisions will be made only in meetings where quorum is complete.
- Only members can make the decision. The expert consultants will only offer their opinions.
- If a member has declared a Conflict of interest (COI) for a proposal then this

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

should be submitted in writing to the Chairperson before beginning the meeting and should be recorded in the minutes.

- The member who has declared COI should withdraw from the EC meeting (leave the room) while the research proposal is being discussed upon. This should be minuted and the quorum rechecked.
- A list of absentee members as well as members leaving or entering in-between the meeting should be recorded.
- Number of proposals reviewed in a meeting should justify that there is ample time devoted for review of each proposal.
- Decision may be to approve, reject or modify the proposals. Specific suggestions should be given for modifications.
- Negative decisions should always be substantiated by appropriate reasons.
- The decision must be taken either by a broad consensus or majority vote and should be recorded. When it is approved unanimously, an approval letter in the prescribed template will be issued and signed by chairman and member secretary. If some members are objecting the study to be approved, chairman will take the voting from the members to see the majority and if majority is there the project will be approved. In that case the voting status also will be mentioned in the approval letter.
- The chairman / member secretary of the committee may provisionally approve without calling a full meeting in case where only administrative amendment has been made.
- This decision will be ratified at the next full committee meeting and minuted.

After the IEC meeting

Preparing the minutes and the decision letters

- The Member Secretary will compile the proceedings of IEC meeting in a concise and easy-to-read style and will check spelling, grammar and context of the written minutes
- The minutes of the meeting will be compiled within 15 working days. The minutes will record whether the decision was unanimous, or whether a vote was taken for the decision. The number of members voting for, against, and abstaining will be recorded. The disclosure of the IEC member for conflict of interest is recorded in the IEC meeting minutes. The questions and answers

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated:20th Nov 2019

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

discussed in each meeting will also be discussed.

- The basis for requiring changes in or disapproving research; and a written summary of the discussion of controversial issues and their resolution must be recorded and filed.

Approval of the minutes and the decision

- The minutes of the IEC meeting will be prepared by Member Secretary, IEC or acting member secretary
- The minutes of the IEC meeting will be approved by Chairperson ratified in the subsequent IEC meeting
- The IEC decisions will be communicated to the PIs

Filing of the minutes of the meeting

Place the original version of the minutes in the minutes file and copy of the minutes are filed in the corresponding files of research protocol reviewed in the meeting.

Communicating the decision with the investigator

The decision will be communicated in writing to the PI, preferably within a period of 15 working days of the IEC meeting at which the decision was made. The decision will be communicated through written letter signed by EC member Secretary/ Chairperson. Original letter will be given to the applicant and copy will be maintained with the EC.

7. Application for Annual Review

a) **Template for EC Approval**

INSTITUTIONAL ETHICS COMMITTEE

Date

To,

<<PI Name and project code>>.

Ref: Study Protocol- <<protocol ID and Title>>

Sub: Ethics Committee approval

Dear <<PI Name>>,

The Institutional Ethics Committee, Pushpagiri Institute of Medical Sciences, Pushpagiri Research Centre, Thiruvalla, reviewed and discussed your application dated <<Date of Submission>> to conduct the clinical trial entitled <<Title of the study>> on <<Date of EC meeting held>>.

The following documents were reviewed and approved:

<<List the documents which are reviewed and approved and reviewed only – separately>>

The following members of the Institutional Ethics Committee were present at the meeting held on <<date of EC meeting held>>.

<<List the members name and their role in the IEC in the box below>>

S#	Name	Role in the Ethics Committee

2		
3		

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

4		
5		
6		
7		
8		
9		

Case 1. <<In case study was unanimously approved follow the below pattern>>

The study was unanimously approved with <<Votes in favour write here>> votes in favour of the study. One member was abstained from voting (<<write the name of the members who abstained from voting>>)

Case 2. <<In case study was non-unanimously approved - follow the below pattern>>

The study was unanimously approved with <<Votes in favour write here>> votes in favour of the study as against <<Votes against - write here>> votes against the study. One member abstained from voting (<<write the name of the members who abstained from voting>>).

We confirm that principal investigator did not participate in the deliberations of the ethics committee for this study and did not vote on the proposal for this study.

Please submit the following documents before recruiting the patients in to the study.

<<List the documents which has to be submitted to the IEC before the study to be initiated at our center>>

Please note that you should follow the requirements given below for this study:

- Do not implement any deviation from, or change to, the protocol approved by the IEC without the prior written approval of this ethics committee. Deviations/ changes to the approved protocol may be implemented without prior approval of this ethics

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

committee only when necessary to eliminate immediate hazards to subjects or when changes involve only logistical or administrative aspects of the trial [e.g. change of study monitor(s), telephone numbers(s)].

Promptly report to the IEC:

- Any changes to or deviations to the protocol approved by this ethics committee that you may implement to eliminate hazards to the trial subjects.
- All serious adverse events.
- New information that may affect adversely the safety of the subjects or the conduct of the trial.

Please submit to the IEC, the status report of the study at every 6 months interval.

Please provide a close out report to the Ethics Committee on the completion of the study.

The IEC is organized and operates according to the requirements of ICH - GCP and requirements of the Indian Council of Medical Research (ICMR) and Schedule Y.

Thank you for your time and efforts.

Cordially,

Member Secretary

Pushpagiri Institute of Medical Sciences,

Pushpagiri Research Centre, Thiruvalla

Version : 1.0 Dated:20th Nov 2019

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

6.1	Information about data relating to non-clinical pharmacology, pharmacokinetics, metabolism profile in animals and toxicology	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.2	Summary of all relevant non-clinical pharmacology, toxicology, pharmacokinetic, and the Investigational Product metabolism studies	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.3	Summary of the methodology used,	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.4	The results and a discussion of the relevance of the findings to the investigated therapeutic effects besides the possible unfavourable effects in humans.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.5	Information about the species used	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.6	Information about number and sex of animals in each group	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.7	Information about Unit dose (mg/kg)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.8	Information about dose interval	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.9	Information about route of administration	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.10	Information about duration of dosing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.11	Information on systemic distribution	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.12	Information about duration of post-exposure follow-up	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13	Results			
6.13.1	Nature and frequency of pharmacological or toxic effects	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.2	Severity or intensity of pharmacological or toxic effects	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.3	Time to onset of effects	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.4	Reversibility of effects	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.5	Duration of effects	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.6	Dose response	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.7	Dose response of observed effects	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.8	The relevance to humans	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.9	Any aspects to be studied in humans	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.10	Comparison of the effective and non-toxic dose findings in the same animal species (i.e. The therapeutic index should be discussed)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.11	The relevance of this information to the proposed human dosing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.13.12	Comparisons made in terms of blood/tissue levels rather than on a mg/kg basis	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.14	Non-clinical Pharmacological (Pharmacodynamics)			
6.14.1	A summary of the pharmacological aspects of the	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

	investigational product and its metabolites studied in animals			
6.14.2	Potential therapeutic activity assessment (e.g. efficacy models, receptor binding, and specificity)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.14.3	Safety assessment (eg. special studies to assess pharmacological actions other than the intended therapeutic effect(s)).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.15	Pharmacokinetics and Product Metabolism in Animals			
6.15.1	A summary of the pharmacokinetics and biological transformation and disposition of the investigational product in all species Studied	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.15.2	Discussion of the findings about the absorption and the local and systemic bioavailability of the IP and its metabolites	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.15.3	Investigational product and its metabolites relationship to the pharmacological and toxicological findings in animal species.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.16	Toxicology			
6.16.1	A summary of the toxicological effects of IP found in relevant studies conducted in different animal species	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.16.2	Single dose	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.16.3	Repeated dose	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.16.4	Carcinogenicity	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.16.5	Special studies (eg. irritancy and sensitisation)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.16.6	Reproductive toxicity	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.16.7	Genotoxicity (Mutagenicity)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7	Effects in Humans			
7.1	Discussion of the known effects of the investigational product(s) in humans	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.2	Information on pharmacokinetics, metabolism, Pharmacodynamics, dose response, safety, efficacy, and other pharmacological activities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.3	Brief summaries of other clinical studies conducted on the same product	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.4	Pharmacokinetics and Product Metabolism in Humans			
7.4.1	A summary of information on the pharmacokinetics of the investigational product(s)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.4.2	Pharmacokinetics (including metabolism, as appropriate, and absorption, plasma protein binding, distribution, and elimination)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.4.3	Bioavailability of the investigational product	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

	(absolute, where possible, and/or relative) using a reference dosage form			
7.4.4	Population subgroups (e.g. gender, age, and impaired organ function).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.4.5	Interactions (e.g. Product-product interactions and effects of food)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.4.6	Other pharmacokinetic data (e.g. results of population studies performed within clinical trial(s).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.5	Safety and Efficacy			
7.5.1	Information about the Investigational Product (s)* (including their metabolites, where appropriate) safety Pharmacodynamics	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.5.2	Information about the Investigational Product(s)* (including their metabolites, where appropriate) efficacy and dose response(s) that were obtained from preceding trials in humans (healthy volunteers and/or patients)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.5.3	In cases where a number of clinical studies have been completed, the use of summaries of safety and efficacy across multiple trials by indications in subgroups may provide a clear presentation of the data.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.5.4	Tabular summaries of adverse drug reactions for all the clinical trials (including those for all the studied indications)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.5.5	Important differences in adverse drug reaction patterns/incidences across indications or subgroups	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.5.6	A description of the possible risks and adverse drug reactions to be anticipated based on prior experiences with the product under investigation and with related products.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.5.7	A description about the precautions or special monitoring to be done as part of the investigational use of the product(s).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8	Regulatory & Post-marketing Experiences			
8.1	Countries where the investigational product has been marketed or approved.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8.2	Any significant information arising from the marketed use should be summarised (eg. formulations, dosages, routes of administration, and adverse product reactions)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Chapter 5 : Agenda Preparation, Meeting Procedures Ethical Review And Preparation Of Minutes Of Meeting

8.3	Countries where the investigational product did not receive approval/registration for marketing or was withdrawn from marketing/registration.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9	Summary of Data and Guidance for the Investigator	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10	Bibliography	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10.1	Overall discussion of the non-clinical and clinical data	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10.2	The information from various sources on different aspects of the investigational product(s)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10.3	Published reports on related products	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10.4	The information given in this section should provide the investigator with a clear understanding of the possible risks and adverse reactions.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10.5	Guidance about recognition and treatment of possible overdose and adverse drug reactions.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

f) Agenda Format

AGENDA OF IEC MEETING

Meeting No :

Location of IEC Meeting :

Meeting date:

Meeting Time:

The Board meeting will proceed in the following sequences:

Period1:

Discussion of the points arising from the minutes of the previous meeting and presentation of agenda of the day's meeting and Declaration of Conflict.

Period2:

A] New Protocol Presentation, Review, Discussion and reaching a decision by voting to approve /raise queries,

B] Review the responses forwarded by the principal investigator to the query letter/ resubmitted protocols

C] Approve protocol amendment and related documents.

D] To review the continuing review report / completion report / final clinical trial report/ Annual report / Termination reports.

E] To review Protocol Deviations /Violations

F] To review other Letters related to projects to review Monitoring reports

G] To inform about the IEC meeting and to review the policy decisions

H] To inform about the SAE Subcommittee meetings and to review SAE / Safety reports.

I] Other points for discussion_

Period3:

Issues reviewed and approved by the IEC member Secretary and Chairperson which are to be reported Secretary and Chairperson which are to be reported for Consideration

Period4:

Issues to be informed to the members at Full Board which are approved by the IEC member Secretary and Chairperson and letters already sent to the principal investigator

Period5:

Other issues based on the interest of members

g) Application For Renewal Of Approval

APPLICATION FOR RENEWAL OF APPROVAL

- IEC Reference number
- Title of the research proposal
- Name of the Principal Investigator (PI) with qualification and designation
- Approval date
- Date study initiated, if no, specify reason
- Has subject recruitment begun?
- If subject recruitment has not begun, give reasons
- How many subjects have been screened?
- How many subjects have been randomized?
- How many Screen failures and or drop outs? Reason
- Is subject recruitment continuing?
- Is the Subjects completed the study, if no number of pending visits.
- Expected date for study completion?
- Have there been any adverse events/ Serious Adverse Events? If yes, give details
- Any Protocol deviation/Violations?
- Have there been any unanticipated study-related problems? If yes, give details.
- List of attachments for review, if any
- Remarks, if any

Signature of the Principal Investigator with date.

NOTE

- Investigator can use own format, but all the information should be furnished.
- Investigator should attach the renewal fee along with the application.

INSTITUTIONAL ETHICS COMMITTEE
PUSHPAGIRI INSTITUTE OF MEDICAL SCIENCES,
PUSHPAGIRI RESEARCH CENTRE,
Thiruvalla, Kerala-689101, India

Ph: 0469 2775518

STANDARD OPERATING PROCEDURES

Chapter: 6

SITE MONITORING

Chapter : 6

SITE MONITORING

1.0 Purpose

The purpose of this chapter is to provide the procedures for site monitoring.

2.0 Scope

This Chapter applies to conducting monitoring of studies involving human subjects at intervals appropriate to the degree of risk but not less than once a year. Depending upon the degree of risk to the participants, the nature of the study, the vulnerability of the study participants and duration of the study, IEC shall choose to monitor the study more frequently.

3.0 Responsibility

ECs shall follow mechanisms to monitor the approved study site until completion of the research to check for compliance or improve the function. Monitoring can be routine or –for cause and shall be decided at a full committee meeting. For research that involves higher risk or vulnerable participants or if there is any other reason for concern, the EC at the time of initial review or continuing review shall suggest that routine monitoring may be conducted at more frequent intervals.

The frequency of monitoring shall be decided during the initial review of the meeting among the EC Members. The monitoring will be done by the Monitoring committee nominated by Chairperson and Member Secretary.

Procedure

This includes review of the overall progress of each study to insure the safety of participants, validity of data, that the projected actual goals are met on a timely basis, eligibility and evaluability rates do not fall below minimum acceptable standards, risks are not excessive, adverse events are appropriately monitored and reported to the appropriate agencies. Inherent in this process is the goal of enhancing the quality of the research.

The Cause for monitoring will be performed based on the following criteria

- High number of protocol violations and deviations;
- Large number of proposals carried out at the study site or by the same researcher;
- Large number of SAE reports;
- Complaints received from participants;
- Non-compliance with EC directions;
- Misconduct by the researcher

5.0 Before the Visit

The EC Secretariat will inform the investigator about the monitoring visit date. The monitoring committee will inform the investigator about the agenda of the monitoring visit.

During the Visit

The monitoring will be done by using the checklist and report will be submitted to the EC Chairperson and member secretary. The report will be discussed in the next full quorum EC Meeting. Monitor should give special attention to right safety well-being of study subjects while reviewing the study documents.

The following objectives are followed while monitoring the study.

- Eligibility of subjects recruited
- Proper recording and reporting of AE and SAE
- Adequate Consent procedure are followed
- Ongoing informed consent procedure is in place
- Adherence to protocol and regulatory requirements
- Investigational Product storage and handling

7.0 After the Visit

Monitoring visit checklist will be filled and submit to the IEC secretariat within 14 days. The report will be discussed in the next full board meeting of IEC. The findings and recommendations from IEC will be communicated to the Principal investigator 14 days after the meeting

ANNEXURES

1. Monitoring checklist
2. Monitoring Visit report template

STANDARD OPERATING PROCEDURES

Chapter 7

**PROTECTION OF SUBJECT RIGHT SAFETY AND WELL-
BEING**

CHAPTER 7

PROTECTION OF SUBJECT RIGHT SAFETY AND WELL-BEING

1.0 Purpose

This Chapter shall provide guidelines for dealing with and accommodating requests by participants/patients regarding their rights as a participant or to resolve their complaints in any approved research study.

2.0 Scope

This Chapter shall apply to all requests concerning the rights and well-being of the research participants participating in studies approved by the IEC.

Responsibility.

It shall be the responsibility of the IEC Member Secretary to provide the required information to the research participants/ research participant's representatives/patient, in the case of queries received.

It shall be the responsibility of the Member Secretary/Chairperson to initiate a process of giving information to the participants or identifying and addressing any injustice that has occurred, if complaints are received from research participants.

The IEC shall assess the adequacy of safeguarding of the rights and welfare of research participants, and the appropriate inclusion of women, minorities, and children, based on the information in the application.

The IEC shall evaluate the involvement of human subjects and proposed protections according to the following review criteria:

- Risk to subjects.
- Adequacy of protection against risks.
- Potential benefits of the proposed research to the subjects and others.
- Importance of the knowledge to be gained.
- Required qualifications and experience of the Investigators for the proposed study

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated:20th Nov 2019

Chapter 7 : Protection Of Subject right safety And well-being

- Any plans to withdraw or withhold standard therapies for the purpose of the research and the justification for such action.
- Plans to withdraw subjects from the study by the Investigator.
- Medical care to be provided to research participants during and after the course of the research.
- Adequacy of medical supervision and social support for the research participants.
- Steps to be taken if research participants voluntarily withdraw during the research.
- Arrangements, if appropriate, for informing the research participant's general practitioner or family doctor, including procedures for seeking the participant's consent to do so.
- Description of any plans to make the study product available to the research participants following the research and description of any financial costs to the research participants.
- Compensations for research participants for attending the visits.
- Provisions for compensation/treatment in the case of the injury/ disability/ death of a research participant attributable to participation in the research.
- Insurance and indemnity arrangements.
- Translations for appropriateness of language, accuracy and completeness of information.

The adequacy of the above points shall be ensured by proper review and monitoring by the EC.

A description of the information shall be given to participants and the persons who will have access to personal data of the research participants, including medical records and biological samples; and measures shall be taken to ensure the confidentiality and security of personal information concerning research participants.

In addition to that IEC office shall have the complaint register forms (Annexure 1) available for subjects who can fill their complaint and furnish in the complaint box. The subjects can also call to the EC contact details provided in their complaint and register the complaint. The EC office shall keep a register (Annexure 2) for the same and communicate with the institution and investigator to resolve it. The resolution shall be discussed and communicated to the subject.

Standard operating procedure

STANDARD OPERATING PROCEDURES

Chapter 08

ADMINISTRATIVE SUPPORT FOR EC

CHAPTER 08

ADMINISTRATIVE SUPPORT FOR EC

1.0 Purpose

Purpose of this Chapter shall be to provide guidance for the administrative support for the functioning of IEC including financial support and resources.

2.0 Scope

This Chapter applies to the administrative support being received by IEC.

3.0 Administrative Support

The institution shall be responsible for establishing an EC to ensure an appropriate and sustainable system for quality ethical review and monitoring. The institution shall be responsible for providing logistical support, such as infrastructure, staff, space, funds, adequate support and time for the Member Secretary to run the EC functions.

The institution shall provide space, infrastructure and staff to the EC for maintaining a full-time secretariat, safe archival of records and conduct of meeting. The selection criteria for administrative support staff shall be based on the qualification and experience as decided by the institution.

Financial Operations

- Ethics committee can be financially supported by the Institution. Every institution shall allocate reasonable funds for smooth functioning of the EC
- A reasonable fee for review may also be charged by the EC to cover the expenses related to optimal functioning in accordance to Institutional policies.
- The income and expenditure of the ethics committee shall be documented in the Income Expense Ledger Book.

Chapter 8 : Administrative Support for EC

- The income and expenditure shall be audited by audit committee of Ethics committee once in a year. The audit report shall be submitted to the Head of Institution and EC chairperson
- Member Secretary shall be responsible for maintaining the finance records
- Member Secretary shall report to the Head of the Institution the income and expenditure report biannually.
- The fees charged by the EC for the review of applications as mentioned in the EC Fee SOP is mentioned in the Annexure. (Annexure 1)

Honorarium to EC Members

- It is recognized that all the Members of EC are busy individuals in their own positions. They, by all means, take time to review the protocol and attend the meeting.
- For balancing the sensitivity of their time on one hand & also not to be coercive in nature by furnishing undue amounts, it is decided that a nominal amount would be paid as compensation/reimbursement to each member who would attend a meeting.
- This amount would also serve as their travel allowance, to & from the meeting venue and other incidentals that the members may spend on account of the meeting.
- The Secretariat staff would be ready with the payments to be paid to the members by cheque/cash, after a meeting. (Annexure 2)

The Members who attended a meeting shall:

1. Sign the attendance sheet.
2. Return all the documents circulated to the members for preparation for the review for the meeting.
3. Sign the Dispatch and Return Log of Documents reflecting the above.

STANDARD OPERATING PROCEDURES

CHAPTER 09

COMMUNICATION WITH STAKE HOLDERS

CHAPTER 09

COMMUNICATION WITH STAKE HOLDERS

1.0 Purpose

Purpose of this chapter to give guidance on the communication process with the Head of Institution, Investigator and Regulatory.

2.0 Scope

This Chapter applies to the communication process for IEC with various stake holders.

Communication with Regulatory

The IEC is registered under Drug controller General of India.

IEC communicate with DCGI on the following topics

- In the contest of revision SOP and constitution of IEC members
- Reregistration process of IEC
- Communicating due analysis report of SAE occurred at the institution
- Any other relevant communication receive from DCGI

Communication with the investigator

IEC will communicate with investigator in writing and same will be documented. The IEC communicates with investigator in following contests

- Receipt acknowledgment for all communication from the investigators
- Reminder for the annual reports, annual review, periodic reports or any other relevant communication expect from investigator
- Deliberations of the meeting via approval letter, disapproval letter or query letter
- Monitoring intimations and monitoring findings
- Any additional information IEC requires regarding the study.

Communication with the Head of Institution

IEC is constituted under the HOI and report to the HOI timely manner. The communication will be through email or writing. Below are the common reporting procedures to HOI.

- Resignation and replacement of members
- Annual assessment of members
- Annual Audit report of EC functioning
- Biannual report from Member secretary regarding overall functioning and finance arrangements.
- Reconstitution and approval of revision of SOP
- Administrative requirements

Annexure

STANDARD OPERATING PROCEDURES

Chapter : 10

**REVIEW OF SERIOUS ADVERSE EVENT AND OTHER
SAFETY REPORTS**

CHAPTER 10

REVIEW OF SERIOUS ADVERSE EVENT AND OTHER SAFETY REPORTS

1.0 Purpose

Purpose of this chapter shall be to give the guidance for the review and reconciliation of Serious Adverse events reporting to the IEC.

2.0 Scope

This SOP chapter shall apply to the IEC review of SAEs and unexpected events reports including follow up reports submitted by investigators.

3.0 Responsibility

The IEC shall be responsible for the review of all adverse events happening in the study. All AEs shall be recorded and reported to the EC according to a pre-planned timetable depending on the level of risk and as recommended by the EC. EC shall give more attention while reporting and reviewing Serious Adverse Events (SAE). The EC shall be responsible for reviewing the relatedness of the SAE to the research, as reported by the researcher, and determining the quantum of compensation and type of assistance to be provided to the participants.

4.0 Definition of Serious Adverse Event (SAE)

Any untoward medical occurrence that at any dose:

- results in death,
- is life-threatening,
- requires inpatient hospitalization or prolongation of existing hospitalization,
- results in persistent or significant disability/incapacity, or
- is a congenital anomaly/birth defect.

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated:20th Nov 2019

All clinical trials under the purview of CDSCO, the timeline and procedures as notified from time to time shall be followed for SAE reporting. All research participants who suffer harm, whether related or not, shall be offered appropriate medical care, psycho-social support, referrals, clinical facilities, etc. Medical management shall be free if the harm is related to the research. Compensation shall be given to any participant when the injury is related to the research. This shall be applicable to participants in any of the arms of research, such as intervention, control and standard of care.

Procedure for reporting SAE

- Investigators who are participating in the clinical trial from the Institution shall be requested to strictly follow the reporting and review guidelines of the SAE as per the local regulations of the country.
- As per the regulation Investigator has to submit the initial report of SAE to EC within 24 hours of SAE occurrence. Investigator can submit the SAE report to EC via an email followed by hard copy. The reporting should make via Appendix XI form along with supportive documents.

Ethics committee E-mail ID for 24-hr SAE submission	
Ethics committee Email:	<u>pushpagiriirb@pushpagiri.in</u>
Ethics committee contact number	0469 2775518

- The investigator has to submit the initial report of SAE to the respective sponsor within 24 hours of SAE occurrence.
- The investigator has to submit the initial report of SAE to the Drug Controller General of India within 24 hours of SAE occurrence at the below mentioned Email ID/Fax No.

Higher Authority E-mail ID and Fax No. for 24-hr SAE submission	
Higher Authority Email:	<u>dci@nb.nic.in</u>
Higher Authority Fax No:	01123236973

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated:20th Nov 2019

- The Investigator and Sponsor have to submit the analyzed report of SAE to the EC Chairman, Head of the Institution and DCGI within 14 calendar days of SAE occurrence.
- On receipt of the analyzed report of SAE from the Investigator, the EC shall organize a full quorum meeting and request the investigator to present about the event. The committee shall discuss about the relatedness of the event with the clinical trial and give opinion on financial compensation to be paid by the Sponsor/ his representative according to the formula published by DCGI.
- A detailed report of recommendation of compensation shall be submitted to the DCGI by EC within 30 calendar days of SAE occurrence.
- If the SAE is death the report shall be submitted to the Chairman of Expert Committee as well within the above-mentioned time frame.

Any injury or death due to the following reasons shall be considered as clinical trial related injury or death and subjects are entitled to receive the compensation.

- a) Adverse effect of investigational product***
- b) Violation of approved protocol, scientific misconduct or negligence by sponsor or sponsor representative or investigator***
- c) Failure of investigational product to provide intended therapeutic effect***
- d) Use of placebo in placebo-controlled trial***
- e) Adverse effect due to concomitant medication excluding standard of care necessitated as part of approved protocol***
- f) For injury to child in utero due to parent's participation in clinical trial***
- g) Any trial related procedures involved in the study***

While deliberating on the quantum of compensation to be awarded to participants who have suffered research-related injury, the EC shall consider aspects including the type of research (interventional, observational, etc.), extent of injury (temporary/permanent, short/long term), loss of wages, etc. For other sponsored research, shall be the responsibility of the sponsor (whether a pharmaceutical company, government or non-governmental organization (NGO), national or international/bilateral/multilateral donor

agency/institution) to include insurance coverage or provision for possible compensation for research-related injury or harm within the budget.

Compensation in case of injury or death during clinical trial:

- In the case of an injury occurring to the clinical trial subject, he or she shall be given free medical management as long as required or till it is established that the injury is not related to clinical trial whichever is earlier.
- In case the injury occurring to the trial subject is related to the clinical trial, such subject shall also be entitled for financial compensation as per order of the licensing authority defined under clause (b) of rule 21, and the financial compensation shall be over and above any expenses incurred on the medical management of the subject.
- In the case of clinical trial related death of the subject, his/her nominee(s) shall be entitled for financial compensation, as per the order of the licensing authority defined under clause (b) of rule 21, and the financial compensation shall be over and above any expenses incurred on the medical management of the subject.
- The expenses on medical management and the financial compensation in the case of clinical trial injury or death of the trial subject shall be borne by the sponsor of the clinical trial.
- The financial compensation for clinical trial related injury or death could be in the form of
 - Payment for medical management;
 - Financial compensation for trial related injury;
 - Financial compensation to nominee(s) of the trial subject in case of death;
 - Financial compensation for the child injured in—utero because of the participation of parent in a clinical trial.
- Any injury or death of the subject occurring in clinical trial due to following reasons shall be considered as clinical trial related injury or death and the subject or his/her

nominee(s), as the case may be, shall be entitled for financial compensation for such injury or death:

- Adverse effect of investigational product(s);
 - Violation of the approved protocol, scientific misconduct or negligence by the sponsor or his representative or the investigator;
 - Failure of investigational product to provide intended therapeutic effect;
 - Use of placebo in a placebo-controlled trial;
 - Adverse effects due to concomitant medication excluding standard care, necessitated as part of approved protocol;
 - For injury to a child in-utero because of the participation of parent in clinical trial;
 - Any clinical trial procedures involved in the study.
- The Sponsor or his representative, whosoever had obtained permission from the Licensing Authority for the conduct of the clinical trial, shall provide financial compensation, if the injury or death has occurred because of any of the above reasons.
 - The Sponsor, whether a pharmaceutical company or an institution shall give an undertaking along with the application for clinical trial permission to the licensing authority defined in clause (b) of Rule 21, to provide compensation in the case of clinical trial related injury or death for which subjects are entitled to compensation.
 - In case the sponsor fails to provide medical management for the injury to the subject and/or financial compensation to the trial subject for clinical trial related injury or financial compensation to the subject's nominee(s) in case of clinical trial related death of the subject, the licensing authority may after giving an opportunity to show cause why such an order should not be passed, by an order in writing, stating the reasons thereof, suspend or cancel the clinical trial and/ or restrict sponsor including his representative(s) to conduct any further clinical trials in the country or take any other action deemed fit under the rules.

Procedure for payment of financial compensation:

The Investigator shall report all serious and unexpected adverse events to the, Licensing Authority as defined under clause (b) of rule 21, the Sponsor or his representative whosoever had obtained permission from the Licensing Authority for conduct of the Clinical trial and the Ethics Committee that accorded approval to the study protocol, within twenty-four hours of their occurrence as per Appendix XI.

The cases of serious adverse events of death shall be examined as given below:

- a. An independent Expert Committee shall be constituted by the Licensing Authority as defined under rule 21(b) to examine the cases and recommend to the Licensing Authority for the purpose of arriving at the cause of death and quantum of compensation in case of clinical trial related death.
- b. The Sponsor or his representative, whosoever had obtained permission from the Licensing Authority for conducting the clinical trial, and the Investigator shall forward their reports on serious adverse event of death after due analysis to Chairman of the Ethics Committee and Chairman of the Expert Committee with a copy of the report to the Licensing Authority as defined under rule 21(b) and the Head of the Institution where the trial has been conducted, within ten calendar days of occurrence of the serious adverse event of death.
- c. The Ethics Committee shall forward its report on serious adverse event of death after due analysis along with its opinion on the financial compensation, if any, to be paid by the Sponsor or his representative, whosoever had obtained permission from the Licensing Authority as defined under rule 21(b) for conducting the clinical trial, to the Chairman of the Expert Committee with a copy of the report to the Licensing Authority within 30 days of the occurrence of the serious adverse event of death.

Chapter 10: Review Of Serious Adverse Event And Other Safety Reports

- d. The Expert Committee shall examine the report of serious adverse event of death and give its recommendations to the Licensing Authority for the purpose of arriving at the cause of the adverse event within thirty days of receiving the report from the Ethics Committee, and the Expert Committee while examining the event, may take into consideration, the reports of the Investigator, Sponsor or his representative whosoever had obtained permission from the Licensing Authority for conducting the clinical trial and the Ethics Committee.
- e. In the case of clinical trial related death, the Expert Committee shall also recommend the quantum of compensation to be paid by the Sponsor or his representative, whosoever had obtained permission from the Licensing Authority as defined under rule 21(b) for conducting the clinical trial.
- f. The Licensing Authority shall consider the recommendations of the Expert Committee and shall determine the cause of death and pass orders as deemed necessary.
- g. In case of clinical trial related death, the Licensing Authority, after considering there commendations of the Expert Committee, shall decide the quantum of compensation to be paid by the Sponsor or his representative, whosoever had obtained permission from the Licensing Authority for conducting the clinical trial and shall pass orders as deemed necessary within three months of receiving the report of the serious adverse event.

Cases of serious adverse events, other than deaths, shall be examined as given below:

- a. The Sponsor or his representative, whosoever had obtained permission from the Licensing Authority for conducting the clinical trial and the Investigator shall forward their reports on serious adverse event, after due analysis, to the Licensing Authority as defined under rule 21(b), Chairman of the Ethics

Chapter 10: Review Of Serious Adverse Event And Other Safety Reports

Committee and Head of the Institution where the trial has been conducted within ten calendar days of occurrence of the serious adverse event.

- b. The Ethics Committee shall forward its report on the serious adverse event, after due analysis, along with its opinion regarding the financial compensation, if any, to be paid by the Sponsor or his Representative, whosoever had obtained permission from the Licensing Authority as defined under Rule 21(b) for conducting the clinical trial, to the Licensing Authority within 30 calendar days of occurrence of the serious adverse event.
- c. The Licensing Authority shall determine the cause of injury and pass order as deemed necessary. The Licensing Authority shall have the option to constitute an independent Expert Committee, wherever considered necessary, to examine such serious adverse events of injury, which will recommend to the Licensing Authority for arriving at the cause of the injury and also the quantum of compensation in case of clinical trial related injury, to be paid by the Sponsor or his representative whosoever had obtained permission from the Licensing Authority as defined under rule 21(b) for conducting the clinical trial.
- d. In case of clinical trial related injury, the Licensing Authority, shall decide quantum of compensation to be paid by the Sponsor or his representative whosoever had obtained permission from the Licensing Authority for conducting the clinical trial and shall pass orders as deemed necessary within three months of receiving the report of the serious adverse event.
- e. The Sponsor or his representative, whosoever had obtained permission from the Licensing Authority for conducting the clinical trial, shall pay the compensation in case of clinical trial related injury or death as per the order of the Licensing Authority as defined under rule 21 (b) within thirty days of the receipt of such order.

Review of Suspected Unexpected Serious Adverse Reaction (SUSAR) / CIOMS

- All other sites SAEs, SUSARs, CIOMS and any other safety information pertaining to the trial have to be notified to IEC as per the timelines given in the guidelines or upon within 7 days of receipt.
- Safety Reports will be acknowledged by the Member Secretary and copy will be retained in the IEC study file/binder.
- All the Safety Reports or updates will be circulated to the members during the meeting
- IEC may ask to provide additional information related to SUSARs as required.

Annexures

1. Data Elements For Reporting Serious Adverse Events Occurring In A Clinical Trial (Table 5 Of New Drug And Clinical Trial Rule)
2. Due Analysis report template
3. Compensation formula

a) DATA ELEMENTS FOR REPORTING SERIOUS ADVERSE EVENTS OCCURRING IN A CLINICAL TRIAL (Table 5 of New Drug and Clinical Trial Rule)

Data Elements for reporting serious adverse events occurring in a clinical trial

1. Patient Details

- Initials & other relevant identifier (hospital/OPD record number etc.):
- Gender:
- Age and/or date of birth:
- Weight:
- Height:

2. Suspected Drug(s)

- Generic name of the drug:
- Indication(s) for which suspect drug was prescribed or tested:
- Dosage form and strength:
- Daily dose and regimen (specify units - e.g., mg, ml, mg/kg):
- Route of administration:
- Starting date and time of day:
- Stopping date and time, or duration of treatment:

3. Other Treatment(s)

- Provide the same information for concomitant drugs (including non prescription /OTC drugs) and non-drug therapies, as for the suspected drug(s):

4. Details of Suspected Adverse Drug Reaction(s)

Standard operating procedure

Version : 1.0 Dated:20th Nov 2019

Chapter 10: Review Of Serious Adverse Event And Other Safety Reports

- Full description of reaction(s) including body site and severity, as well as the criterion (or criteria) for regarding the report as serious. In addition to a description of the reported signs and symptoms, whenever possible, describe a specific diagnosis for the reaction:
- Start date (and time) of onset of reaction:
- Stop date (and time) or duration of reaction:
- Dechallenge and rechallenge information:
- Setting (e.g., hospital, out-patient clinic, home, nursing home):

5. Outcome

- Information on recovery and any sequelae; results of specific tests and/or treatment that may have been conducted:
- For a fatal outcome, cause of death and a comment on its possible relationship to the suspected reaction; any post-mortem findings:
- Other information: anything relevant to facilitate assessment of the case, such as medical history including allergy, drug or alcohol abuse; family history; findings from special investigations etc:

6. Details about the Investigator

- Name:
- Address:
- Telephone number:
- Email ID:

STANDARD OPERATING PROCEDURES

CHAPTER 11

SELF ASSESSMENT PROCESS

CHAPTER 11

SELF ASSESSMENT PROCESS

1.0 Purpose

Purpose of this SOP chapter is to provide guidance for assessment of functioning of IEC.

2.0 Scope

This SOP Chapter applies the measures taken by IEC for the effective functioning.

3.0 Responsibility

The responsibility of self-evaluation of IEC functions shall lie with Chairperson and Member Secretary.

Process

IEC shall have a self-assessment system to ensure the effective functioning of IEC. Self-assessment shall be performed for each member. The self-evaluation shall be done annually. An Audit Committee shall be selected during the meeting which shall be approved by Chairperson.

One or more audit committees can be designated based on the requirement. All committees shall be approved in the full quorum meeting. The Audit Committee can be revised annually.

The Audit Committee shall be responsible for the assessment of functions and operations of IEC. The following areas shall be assessed by the Audit Committee once in a year.

- Functioning of IEC
- Attendance and Participation of Members
- Training and Certifications of Members
- Record Keeping and Archival
- Income and Expenditure of IEC
- Periodic Monitoring and Review
- SAE Management Process
- Documentation Management

Standard operating procedure

Chapter 11 : Self Assessment Process

- Administrative Support
- Performance of Members

The Audit Committee shall share the report to Member Secretary. The Member Secretary shall share the report to the Chairman and Head of Institution. The audit report shall be discussed in the full quorum IEC meeting and Corrective Action and Preventive Actions (CAPA) will be prepared and implemented by the Audit Committee. The implementation of CAPA shall be verified by Member Secretary and the same shall be discussed in the next EC meeting.

Assessment of EC Members

IEC will do assessment of its functioning annually. The member secretary and Chairperson will do the self-assessment using the assessment form. Member Secretary will perform assessment the members and report to the Chairperson. Actions will be taken based on the assessment. The members may be retrained or removed based on the nonperformance in the EC functions.

Annexure

CHAPTER 12

RECORD KEEPING AND ARCHIVAL

CHAPTER 12

RECORD KEEPING AND ARCHIVAL

1.0 Purpose

Purpose of this SOP Chapter is to provide instructions for preparation and maintenance of active study files and other related documents approved by the IEC and storage/archival of closed study files and retrieval of documents.

2.0 Scope

This SOP chapter applies to all active protocol/study files, closed files and their related documents that are maintained in the IEC office and archival site

3.0 Detailed Procedure

All documentation and communication of an EC should be dated, filed, and archived with utmost confidentiality. The documents will be archived for a minimum period of 5 years following the completion of a study. The access is limited to the archived documents and tracked by a Register book for the entry and exit. EC Chairperson, Member Secretary and personnel delegated by Chairperson/Member Secretary only will have access to the archival area.

Documents that should be filed and archived include, but are not limited to:

Administrative Documents

- Constitution and composition of the EC
- Appointment letters
- Signed and dated copies of the most recent curriculum vitae of all EC members
- Signed confidentiality agreements
- COI declarations of members
- Training records of EC members
- Financial records of EC
- Registration/accreditation documents, as required

Standard operating procedure

Pushpagiri Institute of Medical Sciences,
Pushpagiri Research Centre, Thiruvalla
Version : 1.0 Dated:20th Nov 2019

- A copy of national and international guidelines and applicable regulations
- Regulatory notifications
- Meeting-related documents
- Agenda and minutes
- All communications received or made by the EC
- SOPs

Study-related documents

- One hard copy and a soft copy of the initial research proposal and all related documents
 - Decision letters
 - Any amendments submitted for review and approval
 - Regulatory approvals
 - SAE, AE reports
 - Protocol deviations/violations
 - Progress reports, continuing review activities, site monitoring reports
 - All correspondence between the EC and researchers
 - Record of notification issued for premature termination of a study with a summary of the reasons
 - Final report of the study
 - Publications, if any
- Records can be maintained in hard copies as well as soft copies.
 - For each project a separate file will be maintained.
 - All the research related documents and communications of IEC will be dated and filed in the respective binders.
 - All the Study related documents will be filed in the respective study specific binders.
 - Documents related to regulatory clinical trials must be archived for 5 years after the completion/termination of the study or as per regulations.
 - The archival room will be provided with fire extinguisher and pest control to make sure the long term safety of the documents

Retrieval Procedure

- The documents can be retrieved by Authorized personals by requesting via document request form to EC Member Secretary. Up on Permission copy of the requested documents will be shared which will be documented.
- If the investigator needs copy of the document. Investigator has to give document request form and the EC secretariat will issue the document within one week
- All the records shall be accessible for inspection and copying by authorized representatives of the regulatory at reasonable times and in a reasonable manner.

Final Disposal of documents

The files will be disposed off by the IEC secretariat after the archival period of 5 years. A formal document tracking register will be maintained, providing details of the documents being written off / disposed off after notification to IEC in IEC meeting. The disposal shall be performed by means of shredding.

STANDARD OPERATING PROCEDURES

Chapter 13

PREPARING FOR ETHICS COMMITTEE
AUDIT/INSPECTION

CHAPTER 13

PREPARING FOR ETHICS COMMITTEE AUDIT/INSPECTION

1.0 Purpose

The purpose of this Chapter is to guide an Institutional Ethics Committee (IEC) to prepare for an audit or inspection of the IEC.

2.0 Scope

This chapter applies to all the IEC members and the Secretariat.

3.1 Responsibility

It is the responsibility of the Member Secretary, Chairperson, IEC Members and the IEC Secretariat to keep IEC documents ready for audit and to be available to answer questions during audit or inspection by administrative and regulatory authorities.

Detailed instructions

As per the provision of rule 122DD of Drugs And Cosmetic Rule 1945, "The Ethics Committee shall allow inspectors of officials authorized by the Central Drugs Standard Control Organization to enter its premises to inspect any record, data or any document related to clinical trial and provide adequate replies to any query raised by such inspectors or officials, as the case may be, in relation to the conduct of the trial. This SOP chapter is also applicable for the preparation of any audit or inspection from external regulatory bodies.

Receipt of notification of an Audit / Inspection

On receipt of written/ mailed communication regarding audit/ inspection visit, the Member Secretary will inform the Chairperson, IEC members and the Head of Institution, if applicable about the date and purpose of the audit/inspection.

Preparing for the audit

- On receiving information about the audit /inspection, IEC Member Secretary and/ or IEC member/s are given the responsibility by the Chairperson to prepare for the visit with assistance of the Secretariat.
- The Member Secretary and / or designated IEC member/s will make arrangements in accordance with the steps mentioned in the checklist
- The studies with incomplete / missing documents will be dealt with separately and actions taken will be documented.
- Care should be taken to ensure that all documents are kept in the right order for easy and quick access.

On the day/s of Visit

- Chairperson / Member Secretary / designated IEC Member/s should welcome and accompany the auditors/inspectors to the reserved meeting room.
- Designated team members must be present in the meeting room.
- The conversation would start with the auditor/inspector stating the purpose of the visit and the type of information is needed.
- The IEC Chairperson / Member Secretary / IEC Members must answer questions of the auditors/inspectors clearly, politely, truthfully and straight to the point.
- The information and files requested by the auditors/inspectors should be made available by the Secretariat.
- The Member Secretary/ designated IEC member/ Secretariat will make note of the comments, recommendation of the auditors/inspectors.

Correction of deficiencies observed at audit/ inspection

- Member Secretary/ designated IEC member/ Secretariat will review comments and recommendations of the auditor/inspector.

Chapter 13 : Preparing for Ethics Committee Audit/Inspection

- On receipt of Audit/ Inspection Report the Chairperson should implement corrective and preventive measures and set the timeline for implementation of corrections as stated by the auditor/inspector.
- Action plan should be communicated by the Member Secretary/ designated IEC member to the auditor/inspector after seeking approval of the Chairperson.
- A review date for an internal follow-up audit will be decided by the Chairperson (if applicable).

The Member Secretary/ designated IEC member should report the outcome of the internal follow-up audit to the Chairperson.

Recording the Audit/Inspection Visit

- The Member Secretary/ designated IEC member/ Secretariat must keep record of the audit/inspection visit reports and action plans in a separate audit/inspection file.
- The completed checklist and findings from the internal follow-up audit (if applicable) must also be maintained in the internal audit file.\

No. 25/441/2009– AWD
Government of India
Ministry of Fisheries, Animal Husbandry and Dairying
Department of Animal Husbandry and Dairying
O/o Committee for the purpose of Control and Supervision of Experiments on Animals

Krishi Bhawan, New Delhi – 110001
Date: 02/02/2021

To,

Dr Santosh Pillai, Chairman IAEC
Pushpagiri Medical College Sciences & Research Centre
Tiruvalla - 689 101 Kerala
Email: drsantosh74@gmail.com
Mobile: 9447596426

Subject: Renewal of Registration and Reconstitution of Institutional Animals Ethics Committee (IAEC) -regarding

Sir,

The registration of Animal House Facility of your establishment with CPCSEA has been renewed **for a period of five years from the date of issue of this letter.**

2. The registration number of Animal House Facility of your establishment is **602/PO/Re/S/02/CPCSEA for Research for Education purpose on small animals.** Henceforth, this registration number may kindly be quoted in all your future correspondence.

3. The CPCSEA has accepted the following members recommended by the establishment.

Name of the IAEC Members	Designation in IAEC
1) Dr Santosh Pillai	Biological Scientist cum Chairperson
2) Dr Bhagyalekshmi N	Scientist In-charge of Animal House Facility cum Member Secretary
3) Dr Prashanth Rathinam	Scientist from different biological discipline
4) Dr Pooja Raghunath	Scientist from different biological discipline
5) Dr P. N Sasidharan	Veterinarian

4. CPCSEA hereby nominates the following members to the Institutional Animals Ethics Committee (IAEC) of your establishment:

Details of Nominee(s)	Nominated as
1) Dr. Sachin J. Shenoy Biomedical Technology Wing, Sree Chitra Tirunal Institute of Medical Science, Poojapura, Thiruvananthapuram 695012, Kerala Contact No :9447432656 Email :sacshen@sctimst.ac.in	Main Nominee
2) Dr. Nishant Kumar Gupta Sr. Research Associate, Arjuna Natural Extracts ltd., PB No 126, Bank Rd, Periyar Nagar, Aluva, Kerala – 683101 Contact No :9400348605 Email :nishant@arjunanatural.com	Link Nominee

Contd..

3) Dr.Prakash K.G Department of Anatomy, Academic Block, Azeezia Institute of Medical Science & Research Meeyannor Post, Kollam, Kerala- 691537 Contact No :9645216564 Email :drprakashkg@gmail.com	Scientist from outside the Institute
4) Dr. Sibi P.I. Dept of Pharmaceutical Sciences, M.G. University, RIMSR, Puthuppally Rubber Board, Kottayam, Kerala – 686009 Contact No :9446883809 Email :sibitho@gmail.com	Socially Aware Nominee

(Please note that any change in IAEC members can be made only with prior approval of CPCSEA.)

5. The IAEC is valid for a period of five years and is coterminous with renewed period of registration. IAEC is required to be reconstituted at the time of renewal of registration as per CPCSEA guidelines.

6. You are requested to convene the meeting of the re-constituted IAEC within a period of 30 days and upload the same on the website of the CPCSEA.

7. It is stated that only above approved IAEC members shall sign, with date, on the attendance sheet of the IAEC meetings, and decisions will be taken only in meetings where quorum is complete. The quorum for holding IAEC meeting is six (6), and Main Nominee, Scientist from outside the Institute and Socially aware Nominee must be present in such meetings. Link Nominee can attend in case main nominee conveys his unavailability in writing to the chairman IAEC. However, the Link Nominee must be invited once a year to update him/ her about the activities of the IAEC. Any decision taken in the meetings of IAEC without quorum shall be considered invalid.

8. It is also to inform you that before commencing any research on large animals you are required to send research protocols with due recommendation of IAEC to CPCSEA for further approval (procedure for submission of Research Protocols is available on the website of CPCSEA).

Yours sincerely,

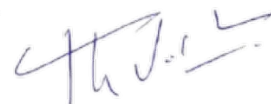

(Dr. S. K. Dutta)
Member Secretary (CPCSEA)

Copy for necessary action to: Nominees of CPCSEA.

The Main Nominee is requested to ensure that the IAEC meetings are held regularly as stipulated in the SOP of CPCSEA and submit the Annual Inspection Reports of the Animal House Facility regularly on the Website of CPCSEA.

Dr. Aby Mathew T. MDS
Principal
Pushpagiri College of Dental Sciences

**INSTITUTIONAL REVIEW BOARD
PUSHPAGIRI INSTITUTE OF MEDICAL SCIENCES & RESEARCH CENTRE**

No: IRB/03/2023

27th October, 2023

MINUTES OF THE MEETING

The IRB meeting was held on 27th October, 2023 from 09:00 am at **the Conference Hall, Pushpagiri Research Centre**. All the members of the ethics committee attended the meeting. Dr. Hari Kumar welcomed everyone for the meeting. Previous minutes of the meeting was approved

ATTENDANCE: the table below lists all members of the ethics committee, their role, and attendance

Dr Harikumar B Nair	Ayurvedic Physician & Researcher	Chairperson
Dr Nebu George Thomas	Professor, Pushpagiri College Of Dental Sciences	Member Secretary
Dr Nibu Verghese	PhD (Plant Biotechnology)	Scientific Member
Dr Vikram Gowda	Vice-principal, Medical college	Medical Scientist
Dr Liya Roslin Joseph	Assistant Professor of Pharmacology	Medical Scientist
Fr. Sibir Mathew	Bachelor in Theology	Member
Dr T M Chary	PhD	Scientific Member
Mr Lijo George	B.Com	Lay Person
Adv. Minu Mathews	Advocate	Legal Expert
Dr. T P Thankappan	MBBS (MD-Dermatology and Venereology)	Clinician
Dr Athulya G Asokan	MD (General Medicine)	External Member
Dr. Rosin George	MD Community Medicine	Scientific Member
Dr. Melvin	Associate Professor from SRM Medical College Hospital and Research Centre.	External Subject Expert

Members Absent with apologies: 3

Non-Voting Member: NIL

Members alternating: NIL

Guests (Include Affiliation): Dr. Melvin, Associate Professor, SRM Medical College Hospital and Research Centre.

Total count: 10 out of 13.

Quorum: The quorum was present. > 50% members with 5 specified category as per ICMR Guidelines/Schedule Y. The chair person called the meeting to order, after confirming the Quorum was present

Attendance Notes:

- Members in attendance who recused themselves: None
- Conflict of Interest of IRB Members: None

Regulations followed for IRB Motion: Schedule Y, ICMR 13 principles

SL NO	TITLE OF THE PROPOSAL	NAME OF PI	STARTING TIME
	General Discussion: Previous Meeting Minutes Approval Welcoming of Dr. Melvin George , Professor Department of Clinical Pharmacology, SRM Medical College Hospital & Research Centre		09.00 am
01/2023	<p>Knowledge and awareness of dental implants as a treatment choice for prosthetic rehabilitation among an adult population –A Cross-sectional study</p> <p>Motion Comments</p> <p>Dr. Chary What is the intention of the study?</p> <p>Dr. Harikumar In the inclusion criteria, why do you include patients with missing teeth rather than including the general population?</p> <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>	Dr. Sunu Alice Cherian	09: 30am
02/2023	<p>Proportion of Temporomandibular disorders among the Central Kerala population: A cross- sectional study</p> <p>Motion Comments</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. What is the sample population? 2. What is the sample size 3. Better to modify the title 4. Add Malayalam version of the questionnaire <p>Dr. Vikram Gowda</p> <ol style="list-style-type: none"> 1. Modify the title as we include only dental OP patients 	Dr. Robin Alex Cherian	09.45 am

	<p>2. Better to check validation of questionnaire after clinical examination</p> <p>Dr Chary</p> <ol style="list-style-type: none"> 1. What is the purpose of the study? 2. Modify the objective by adding what is done for patients after getting diagnosed – include treatment and outcome <p>Dr. Harikumar</p> <ol style="list-style-type: none"> 1. Translate the questionnaire into local language <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. The questionnaire and clinical examination can be compared and questionnaire can be checked for validity <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. Better to use a paper based questionnaire survey rather than Google forms <p>Dr. Melvin</p> <ol style="list-style-type: none"> 1. There is no mention in the protocol how the investigators plan to ensure that the population of Central Kerala is represented? 2. What will be the sampling strategy adopted? 3. The authors should define which all districts come under Central Kerala in the protocol and highlight how from each of these regions a representative sample will be drawn. <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>		
<p>03/2023</p>	<p>Clinical And Epidemiological Profile Of Liver Dysfunction In Dengue Fever – An Observational Single Centre Study</p> <p>Motion</p>	<p>Dr. Maria Davis</p>	<p>10:00 am</p>

	<p>Comments</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. What is the inclusion and exclusion criteria? 2. Elaborate more on exclusion criteria 3. Is it mandatory to have CBC checked on every visit? 4. Are you looking for primary or secondary dengue patients? 5. Are you checking for PTT and APTT 6. Check urine analysis if you are checking for clinical profile 7. What is the sample size? 8. What is the duration of the study? <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. What is the objective of the study? 2. Specify the objectives 3. Better to change the title of the study <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. Are you planning to establish diagnostic criteria? <p>Dr. Vikram Gowda</p> <ol style="list-style-type: none"> 1. It's better not to collect name, address for informed consent <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. What is the study design? 2. What is the outcome of the study? <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>		
<p>04/2023</p>	<p>Association of serum Calcium concentration and blood glucose levels in Type 2 Diabetic Patients attending a Tertiary care hospital in South Kerala.</p>	<p>Dr. Leya Elizabeth</p>	<p>10:15am</p>

**Motion
Comments**

Dr. Athulya

1. Why do you want patients with 5 years of diabetes?
2. Better to include newly diagnosed cases
3. Many confounding factors will be present after 5years of diabetes

Dr. Liya

1. Certain drugs can affect the Calcium level and hence its better to get newly diagnosed patients
2. Are you checking Vit D levels along with calcium?

Dr. Chary

1. Where are you planning to assess the Calcium level?
2. How can you correlate Calcium level with diabetes?

Dr Vikram Gowda

1. Suggestion to do an animal study in 2 groups and establish the calcium level with insulin secretion

Dr. Melvin George

1. The investigators may attempt to increase the complexity of the study- for eg. determination of insulin resistance, VitD/PTH levels and if its confounding influence can be reduced.
2. Studies have shown hypercalcemia can increase DM risk. But will this sample size be sufficient to identify that?

Answers

- 1) We will be correcting the inclusion criteria as suggested by the committee members to Newly diagnosed Diabetes patients

	<p>2) Yes ONLY newly diagnosed diabetes patients will be included in the studies</p> <p>3) Keeping confounding factors in mind newly diagnosed diabetes patients will be included in the study</p> <p>4) Since certain drugs will affect calcium levels ,newly diagnosed patients will be taken for the study and NOT those with more than 5 years of history of Diabetes</p> <p>5) Yes</p> <p>6) It will be conducted in Biochemistry lab of Pushpagiri Research Centre</p> <p>7) We will correlate it with blood sugar levels and see if there is any association as calcium is said to play a role in the intracellular regulation for release of insulin and uptake of glucose as mentioned the in the rationale and introduction of the proposal submitted with the references</p> <p>8) yes we are thinking of conducting this study in animals if funding is available .</p> <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>		
<p>05/2023</p>	<p>A prospective cross-sectional study – Diaphragm dysfunction on ultrasonography as a noninvasive technique for detecting intraabdominal hypertension in clinically suspected patients -a pilot study</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. What is definition of clinically suspected intra-abdominal pressure? 2. How is intra-abdominal pressure intravesicular pressure? 3. Better to put intravesicular pressure in title 4. How is intravesicular pressure correlated to intra-abdominal pressure? 5. How are you going to measure intra-abdominal pressure? 6. Intra-abdominal pressure is a vague term 	<p>Dr. Manju Mathew</p>	<p>10.30 am</p>

	<p>7. Look for complications of patients with increased pressure</p> <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. Try to first establish the intra-abdominal pressure first in series of patients 2. Intravesicular pressure is a surrogate marker for intra-abdominal pressure 3. Who is going do the USG for your patients? 4. Get consent from first degree relative <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. What is the objective of the study? <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. Is doing USG a routine for all patients? <p>Dr Rosin</p> <ol style="list-style-type: none"> 1. What is the outcome of the study? 2. Are you going to find a cut off for diaphragm dysfunction? <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>		
<p>06/2023</p>	<p>Comparison of teaching methodology during ultrasonography training session for MBBS students during elective posting in critical care unit– a retrospective study</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. One group you train with video and hands on and then cross over 2. The study should be a prospective study 3. Method of teaching should be defined clearly <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. Make a checklist before initiating the study. <p>Dr. Vikram</p>	<p>Dr. Manju Mathew</p>	<p>10.45 am</p>

	<ol style="list-style-type: none"> 1. Define you study properly 2. Define you outcomes of the study and evaluate it 3. This study has to restructured and submitted <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. Grouping should be carefully done <p>Dr. Melvin</p> <ol style="list-style-type: none"> 1. No sample size calculation is mentioned. 2. no statistical analysis plan is present. <p>The study is advised to be submitted in next IRB meeting by making necessary corrections.</p> <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>		
<p>07/ 2023</p>	<p>Clinical profile of acute kidney injury in diabetic Ketoacidosis – An observational single centre study</p> <p>Motion Comments</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. What is the average monthly admission of DK? 2. Is it difficult to get 97 patients within 6 months 3. What is the novelty of the study? 4. What characteristics of DK are you looking for? 5. Define the determinants of DK are you looking for before the start of the study? 6. Are you going to follow up these patients? Better to do so 7. Are you going to do USG for these patients <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. The term prevalence has to be changed 2. It is a longitudinal study 	<p>Dr. Anna Mary Thomas</p>	<p>11.00 am</p>

	<p>3. What is the prevalence of kidney injury in literature?</p> <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. What is the recurrence of DK patients? <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>		
<p>08/2023</p>	<p>A comparative study to evaluate the oxidative stress markers in athletes and non-athletes</p> <p>Motion Comments</p> <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. High altitude has to be defined properly 2. Define your population clearly 3. Who are the athletes and non-athletes in this study 4. On basis did you identify the 25 samples? <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. Define all category of athletes. 2. What is the sample size? 3. Include informed consent in your study <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. Define altitude - how above the sea level 2. What is the oxygen pressure there? 3. Better to include SOD 4. How are you going to assess NRF 2? 5. Will 25 sample be enough <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. How do select the population? 	<p>Dr. Suboj Babykutty</p>	<p>11.15 am</p>

	<ol style="list-style-type: none"> 2. What is the study setting 3. How are you going to collect blood sample? 4. Include the sample size formula 5. Is both males and females included in the study? <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. Method of selecting your sample? 2. What is your sampling method? <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>		
<p>09/2023</p>	<p>Prevalance And Risk Factors For Postpartum Depression.</p> <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. How did you get the sample size? 2. Study will be more strong if you have psychiatric person in the study 3. Avoid name while data collection <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. How frequently will you check for score? <p>Minu</p> <ol style="list-style-type: none"> 1. Get informed consent <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. This is a sensitive study so better to add a psychiatrist in this study. 2. Title has to be modified as it is a hospital based study <p>Dr. Rosin</p>	<p>Dr. Vineetha Wills</p>	<p>11.30 am</p>

	<p>1. Will you assess a patient who scored more than 13 in the second visit in the third visit also?</p> <p>2. What is the significance of this score in second test period?</p> <p>Dr. Melvin</p> <p>1. The protocol should mention what are the specific factors that the investigators are considering to increase the risk of postpartum depression.</p> <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>		
10/2023	<p>Attitude and practice regarding the use of over the counter medicines after the emergence of covid-19 pandemic among general population.</p> <p>Motion Comments</p> <p>Dr. Vikram Gowda</p> <p>1. Suggestion to reduce the sample size</p> <p>2. Change study setting to community areas</p> <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>	Ms. Suby Ipe	11:45am
11/2023	<p>“Mycogenic Synthesis and Antimicrobial Evaluation of Zinc Oxide Nanoparticles against Clinical Isolates of Klebsiella species from a Tertiary Care Hospital in Kerala, India”.</p> <p>Motion Comments</p> <p>Dr. Vikram</p> <p>1. How are collecting the sample?</p>	Sijo A	12:00pm

	<p>2. What are your sample?</p> <p>3. Do you collect personal details of the patients?</p> <p>4. What will you do with the samples?</p> <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. What nanoparticle are you preparing? 2. What is the function of the nanoparticle? 3. What is the advantage of using nanoparticles? <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. Where will be preparation of nanoparticles be carried out? <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>		
<p>12/2023</p>	<p>Prevalence Of Metabolic Syndrome Among Adults In Two Suburban Medical Facilities In Southern Kerala.</p> <p>Motion Comments</p> <p>Dr Vikram</p> <ol style="list-style-type: none"> 1. Title is not clearance 2. Who is your population? 3. Patients who visit hospital have systemic problems 4. So random population should be selected <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. How will you diagnose patients with metabolic disorders? 2. Where will you analyse the sample? <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. What is the function of angiotensin? 2. People you have selected what life style they belong to? 	<p>Savitha Jose</p>	<p>12:15pm</p>

	<p>Dr. Liya</p> <ol style="list-style-type: none"> 1. Is it a funded study? 2. Get a proper consent before collecting blood samples 3. How will you store the sample? <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. How will you decide the no of samples in each centre? 2. Why don't you select a single centre? <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>		
13/2023	<p>Factors associated with overweight and obesity in under-five children – a hospital-based study</p> <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. What is the sample size? 2. Modifying the title would be better. 3. Its better we get an assent. <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>	Dr. Jacob	12:30pm
14/2023	<p>Preventive oral health behaviors, health status, and dental treatment needs of children with special health care needs.</p> <p>Motion Comments: No Comments</p> <p>*The PI will start the study only after the receipt of approval letter by the Committee.</p>	Dr. Nebu	12:45pm

SL NO	TITLE OF THE PROPOSAL	NAME OF PI	STARTING TIME
	<ul style="list-style-type: none"> General Discussion: Previous Meeting Minutes Approval Welcoming of Dr. Arun M Xavier, Amrita School of Dentistry 		09.00 am
1.	<p>The assessment of oral health status among older adults residing in old age homes and its association with behavioural, psychosocial and nutritional factors – A multi centric cross-sectional study.</p> <p>IRB Comments</p> <p>Dr. Nibu Verghese</p> <ol style="list-style-type: none"> Why have u selected north Kerala and government institutions How many old age homes are available How will you obtain permission to conduct the study What is the difference between the oral health status of people living in old age homes and the general population What is the research problem If govt doesn't allow, take 50% from govt and private old age homes <p>Dr. Chary</p> <ol style="list-style-type: none"> Will there be more organized data in government old age homes? Mention the number of old age homes Why don't you ask the home in charge regarding nutritional assessment rather than inmates <p>Dr. Nebu</p> <ol style="list-style-type: none"> Is your questionnaire validated Mention the study setting 	Dr. Abdul Saheer P	09:15am

3. What is the sample size
4. What is the benefit for the vulnerable population?

Dr. Athulya

1. How are you going to assess behavioural factors
2. Which tool will you be using to assess each factor?
3. Modify your second objective
4. How is social support related to oral health??

Dr. Liya

1. You need to specify which tool will be used to assess each factors
2. MNA tool is very vague
3. Is this a follow-up study?
4. Why have you particularly selected old age homes?
5. Modify the title
6. How will you exclude medically compromised patients better specify which components will be excluded.

Dr. Rosin

1. If you approach district level, you will have easy access to
2. How have you calculated the sample size?
3. The sample size is too high
4. Better to mention the number of old age homes.
5. Out of total how many homes will be selected

Dr. Arun

1. Choosing govt institutions won't be sufficient
2. Ideal to include ppl from private old age homes
3. Do you anticipate any difference in the quality of life of ppl living in old age homes and general population
4. Mention the names of the institution

	<ol style="list-style-type: none"> 5. Whether the institutions will represent the districts 6. Do you think the study population will get exhausted with the half an hr questionnaire 7. Is the questionnaire suitable for Indian population 8. Better to go for validation process 		
2	<p>Development and validation of a tool to analyse the social determinants of oral health outcomes among adults in rural and urban areas of South Kerala – A mixed methods approach.</p> <p>IRB Comments</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. Is the sample size calculated <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. How is the panel selected? Detailed report needed 2. What is the designation of the panel selected 3. Will you assess criterion validity 4. How will you select the population? <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. What social factors are considered 2. How is questionnaire validated <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. You will need to present the study again after pilot study (phase I study) 2. Which districts are you selecting? 3. How will you select the subjects? 4. What is your exclusion criteria? <p>Dr. Arun</p>	<p>Dr. Saira Siraj E</p>	<p>09.30 am</p>

	<ol style="list-style-type: none"> 1. What are the oral diseases expected in this age group? 2. Who is the person going to help you to categories the 3. Who would community members comprise of? 4. Sample of 40 does it represent the male and female population 5. Better submit for funding 		
3	<p>Adjunctive Low-Level Light Therapy for Periodontitis and Oral Mucositis in Cancer Patients</p> <p>IRB comments</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. What are other indications of this light 2. Are there any prior studies done? 3. Will patients will trained to use it? 4. How will you manage the side effects? 5. When will the outcome measured? 6. What will do if patient has continues chemo treatment 7. Will you continue the treatment after the mucositis subside? 8. There may be many confounders if you check outcome after 1 year. 9. 3rd objective may not be needed <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. What is the cost of the instrument? 2. Written consent form need to be added <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. Safety of the instruments to be assessed 2. What are the side effects of continuous use? 3. How will you make sure that patients uses it correctly 4. Do not include ongoing treatment patients, so selection bias will happen 	<p>Dr. Betsy Joseph</p>	<p>09.45 am</p>

	<p>5. Decide the compensation rate 6. Enquire the diet pattern during this study</p> <p>Dr Chary</p> <p>1. What is the action of treatment?</p> <p>Dr. Arun</p> <p>1. Asking the patient to rinse with the effervescent tablet and placing the instrument in mouth might be difficult for patient to perceive</p> <p>2. Sterilization of instrument is questionable</p> <p>3. What if VAS score goes high will you stop the treatment?</p> <p>4. Modify the inclusion criteria</p> <p>5. Are you doing a patch test for every patient before introducing the dye?</p> <p>6. What are the potential risk to patients?</p> <p>7. Choosing patients should be careful.</p>		
4	<p>To study the prevalence, risk factors, associations, clinical characteristics, lab parameters, radiological features, treatment approach, outcomes, complications in IIH patients.</p> <p>IRB Comments</p> <p>Dr. Athulya</p> <p>1. How will you assess the prevalence of the study</p> <p>2. What are novel risk factors going to be assessed</p> <p>3. Which drugs are you going to assess</p> <p>4. How will you categorize the clinical characteristics</p> <p>5. What ophthalmic assessments will you do</p> <p>6. What novel imaging findings will you do</p> <p>7. How will you follow up the patients</p> <p>8. How will you define the treatment outcome?</p> <p>9. Minimize the objectives</p>	Dr. Reji Thomas	10.00 am

	<p>10. Treatment protocol should be included in proforma</p> <p>11. How many patients do you get in a month</p> <p>12. Modify the research question</p> <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. Is is a multi centric study 2. You need to correct it to proportion 3. Need to modify the objective 4. What is the study design 5. How long is the follow up <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. Streamline the title <p>Adv Minu</p> <ol style="list-style-type: none"> 1. Informed consent to be added <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. What is your sample population? 2. What age group? 3. Add a control group in your study 4. Who will decide which method to follow? 5. Is there a follow up for patients? <p>Dr. Harikumar</p> <ol style="list-style-type: none"> 1. Is lumbar puncture a routine procedure for this study 		
5	<p>Safety and tolerance to Maranta arundinacea (arrowroot) added to formula feeds in ICU patients -a pilot study</p>		

	<p>IRB Comments</p> <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. Title is not clear and needs modification 2. Safety and tolerance can be added as secondary objective 3. Define you study design 4. How will you obtain the arrowroot powder <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. Modify the title – change the pilot study and add RCT in the study title 2. Add powder in the title <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. Modify the aims of the study 2. How long will you be giving the treatment 3. Modify you inclusion criteria and check for GI Side effects 4. Check and define the quantity of the feed 5. Check for the confounders 6. When will you assess the bacteremia? 7. Remove bacteremia and include only nosocomial infection 8. Methodology needs to be specified 9. GI tolerably of arrowroot powder with formula when compared with formula feeds <p>Dr. Nebu</p> <ol style="list-style-type: none"> 1. Need CTIRI registration <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. How is preparing arrowroot preparation 2. Are you using a standard powder 3. You cannot emphasize on protein content in Arrowrot 	<p>Dr. Manju Mathew</p>	<p>10.15 am</p>
--	--	--------------------------------	------------------------

	<p>4. You need a clear composition of the powder preparation</p> <p>5. You need to reduce the calorie from the formula and the add arrowroot</p> <p>6. How will you estimate that bacteria count is reduced</p> <p>Dr. Harikumar</p> <ol style="list-style-type: none"> 1. Standardization of product is needed 2. CTRI registration is needed 3. Central standards of arrowroot if available please use the same 		
6	<p>Ultrasound training during elective posting of medical undergraduates in the critical care unit of a tertiary teaching hospital for integrated clinical and sonographic cardiorespiratory assessment: a prospective study</p> <p>IRB Comments</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. How many assessment for the students? 2. Will there be written assessment for students? 3. Define your objectives 4. Remove from -for integrated clinical – assessment 5. Are you checking feseablity of this study 6. How will you check time of image acquisition <p>Dr.Liya</p> <ol style="list-style-type: none"> 1. Will the same material used for all assessments? 2. Modify the title 3. Comparison of effectiveness of 2 different training techniques 4. Time taken for image acquisition also as primary objective 5. Check feedback as secondary objective 	Dr. Manju Mathew	10.30 am

	<p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. Add a comparison in title 2. It's an educational interventional study 		
7	<p>An audit of the time from ordering for the bilirubin level to reporting to measure the proportion of delayed reporting: A prospective study</p> <p>IRB Comments</p> <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. Objective must be changed 2. What is sub clinical jaundice 3. Outcome of the patient based on particular delay time will be more meaningful 4. Add some more components to the study. <p>Dr. Liya</p> <ol style="list-style-type: none"> 1. Objective should be measurable 2. This study will not have relevance <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. First objective - To estimate 2. Second objective – to Determine <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. Is it an institutional problem? 2. What intervention will you do if there is a delay? <p>Resubmit the proposal and present in the next IRB meeting</p>	Dr. Bincy Varghese	10.45 am

8	<p>The Role Of Prolotherapy And Platelet Rich Plasma In Chronic Osteoarthritis Knee - A Pilot Study</p> <p>IRB Comments</p> <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. Is it an approved treatment modality for using both treatments at the same time? 2. Is there any literature supporting the above statement 3. Resubmit the proposal <p>Dr. Nebu</p> <ol style="list-style-type: none"> 1. Need CTRI registration <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. You need to anticipate the side effect 2. Check for similar studies in the literature. <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. Resubmit the proposal 	<p>Dr. Jimi Jose</p>	<p>11.00 am</p>
9	<p>An Audit of admission to seizure control- Intervention time- A retrospective study</p> <p>IRB Comments</p> <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. Is it an approved treatment modality for using both treatments at the same time? 2. Is there any literature supporting the above statement 3. Resubmit the proposal <p>Dr. Nebu</p> <ol style="list-style-type: none"> 4. Need CTRI registration 	<p>Dr. Jewel Maria George</p>	<p>11.15 am</p>

	<p>Dr. Athulya</p> <ol style="list-style-type: none"> 5. Check for similar studies in the literature. 6. You need to anticipate the side effect <p>Dr. Chary</p> <ol style="list-style-type: none"> 7. Resubmit the proposal 		
10	<p>Comparative Evaluation Of Ctivation Techniques On Edta & Citric Acid Irrigants In Expression Of Growth Factors From Dentin: An Invitro Study</p> <p>IRB Comments</p> <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. Change evaluate to estimate in objectives 2. Change it to varying concentrations <p>Dr Arun</p> <ol style="list-style-type: none"> 1. What is the novelty of the study. Kindly elaborate. 2. How will directly commute the loss of volume of canal to growth hormones after agitation? 3. How will you estimate the volume of the canal? 4. Why do you do manual agitation? 5. Suggestion – replace one parameters with something else novel <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. What is your control group? 2. What is the mechanism of EDTA? 3. Is calcium an inhibing factor for growth factors? 4. Is it a multicentric study? 	Dr. Megha S	11.30 am

	<p>Dr Rosin</p> <ol style="list-style-type: none"> 1. Suggestion to reduce the objectives 		
11	<p>Combination of Vital Pulp Therapy (VPT) and Non-Surgical Endodontic Therapy (NSET) for management of permanent mandibular first molars with Symptomatic Irreversible pulpitis and Apical Periodontitis.</p> <p>IRB Comments</p> <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. What is the outcome of the study? 2. What is the parameter measured? 3. 2nd point of objective as primary objective 4. 3rd and 4th point as secondary objective <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. What is the clinical outcome of the study? 2. How many exposures are you giving a patient? Suggestion to reduce the exposure 3. Is this a self funded study? <p>Dr. Arun</p> <ol style="list-style-type: none"> 1. Categories primary and secondary objectives 2. What is the symptom that you are looking for? 3. How will you categorize pain? 4. Be more specific while selecting sample 5. Why did you choose mandibular molars? 6. What is PIA score more than or equal to 3? 7. Is CBCT required for this study? Justify 8. Why is ASA type I used. Better use the term healthy patients 9. What is your line of treatment if hemostasis not obtained in 8 minutes 10. Why do you exclude patients taking antibiotics <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. CTRI registration is needed for the study 	<p>Dr. Betty Shaji</p>	<p>11.45 am</p>

12	<p>‘Comparative Evaluation of the Efficacy of Various Methods in Locating the 2nd Mesio Buccal Canal in Maxillary First Molars: An In vitro Study’</p> <p>IRB Comments</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. How will you test the efficacy of the technique? 2. Can you equally divide the number of teeth under every technique 3. Add one more imaging modality and compare <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. Title has to be modified 2. Sample size has to be recalculated <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. It can be only a descriptive study 2. You should subject all teeth to all procedure and subject to MICRO CT <p>Dr. Arun</p> <ol style="list-style-type: none"> 1. Categorize the primary and secondary objectives 2. How will you check efficacy of a cross sectional view 3. How is the assessing the MICRO CT 4. What are the chances of having MB2 canal 5. Alteration of complete methodology needed 6. Efficacy cannot be calculated based on percentage 7. How will you calculate specificity and sensitivity of the test assessed? 	Dr. Meenu Sara	12:00pm

13	<p>Effect of zirconium oxide and silver nanoparticles on cell viability, tear strength and shore hardness of maxillofacial silicone elastomers: An in vitro study</p> <p>IRB Comments Dr.Athulya</p> <ol style="list-style-type: none"> 1. How will you test the efficacy of the technique? 2. Can you equally divide the number of teeth under every technique 3. Add one more imaging modality and compare <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. Title has to be modified 2. Sample size has to be recalculated <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. It can be only a descriptive study 2. How will you check efficacy of a cross sectional view 3. How is the assessing the MICRO CT 4. What are the chances of having MB2 canal 5. Alteration of complete methodology needed 6. Efficacy cannot be calculated based on percentage 7. How will you calculate specificity and sensitivity of the test assessed? 	Dr. Sobin Kurian	12:15pm
14	Comparative evaluation of the primary stability with different implant thread design using conventinal and osseodensification technique: A study on cadaver.	Dr. Firoz Khan	12:30pm

	<p>IRB Comments</p> <p>Dr. Arun</p> <ol style="list-style-type: none"> 1. Change the spelling mistake in title 2. Alter the title 3. Statistics will be complicated. 4. Lot of background information not required 5. Please change the tense to present tense 6. Variable – primary and secondary stability – check and correct 7. Are you taking 24 goat mandible? 8. Sample size need to be elaborated and more specified 9. Second part of protocol not submitted. Kindly resubmit protocol again 10. Add flowchart to the protocol <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. Put less contents in each slide rather than making it over crowded 		
15	<p>To Compare The Impact Of Cast Endocrowns Over Other Auxillary Retentive Features As A Retentive, Alternative For Short Clinical Crowns: An Invitro-Study</p> <p>IRB Comments</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. Is this an in vitro study? <p>Dr. Arun</p> <ol style="list-style-type: none"> 1. Modify the title 2. Use of other auxillary features – modify 3. Work on protocol and second part not attended 4. Revise the methodology 5. Is modifivation done on tooth or crown 6. Protocol is vague. Correct and Resubmit 	Dr. Riya Ann Joseph	12:45pm

	<p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. what statistical analysis will be used ? 		
	LUNCH BREAK		01:00pm
16	<p>Comparative assessment of serum levels of C-reactive protein in Stage II and Stage IV periodontitis patients with type 2 diabetes reporting to a Tertiary health care centre in South Kerala.</p> <p>IRB Comments</p> <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. Who will pay for lab work? <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. Why are you taking diabetic patients? 2. What is your exclusion criteria 3. It will be very difficult to find diabetic patients alone <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. Why are you excluding non smokers? Correct it <p>Dr. Arun</p> <ol style="list-style-type: none"> 1. Modify the title 2. What are you expecting in your results 3. Why have to excluded ppl under anti inflammatory medication– for past 6 months 4. What is the parameter checked for diabetes? 5. What are the grades of diabetes taken for this study? 6. Are you checking pre diabetic levels? 	<p>Dr. Anjana Appukuttan</p>	<p>01:30pm</p>

17	<p>Role Of Diffuse Reflectance Spectroscopy In Evaluation Of Periodontal Inflammation In Biofilm Induced Gingivitis And Periodontitis.</p> <p>IRB Comments Dr. Athulya</p> <ol style="list-style-type: none"> 1. How will you obtain the second objective? 2. Are you determining the severity of periodontitis with clinical methods and then comparing? <p>Dr. Rosin</p> <ol style="list-style-type: none"> 1. What is clinical validity? 2. How will you measure it? <p>Dr. Arun</p> <ol style="list-style-type: none"> 1. What are steps taken to measure clinical validity? 	Dr. Rajasree	01:45 pm
18	<p>A comparative study on duration of recovery of infraorbital neurosensory deficits among patients who undergo open reduction and internal fixation (ORIF) of Zygomaticomaxillary complex(ZMC) fracture v/s conservative management.</p> <p>IRB Comments Dr. Arun</p> <ol style="list-style-type: none"> 1. What is the conservative management for the zygomatic fracture 2. How can you say which method is better 3. Are you trying to compare the surgical and non-surgical method 4. What are the result outcome? 5. How many cases will you get per month 6. Are you taking retrospective sample? 7. What is your sample size? 	Dr. Ashley Roy	02:00 pm

	<p>8. Are you categorizing patients regarding the grade of fracture?</p> <p>Dr Athulya</p> <ol style="list-style-type: none"> 1. What is your inclusion criteria? 2. Who is deciding which patients will go for conservative or surgical management? 3. Are you checking neurosensory deficient at time of admission 4. Inclusion criteria should include the classification of fracture 5. What is frequency of people having deficient <p>Dr. Vikram</p> <ol style="list-style-type: none"> 1. How will you compare the selected population? Only if sample population is of same condition, comparison can be done. 2. Recalculate the sample size again. 		
19	<p>A Comparative Study On Relapse Of Maxillary Orthognathic Surgery With Cad/Cam Assisted Method V/S Conventional Method.</p> <p>IRB Comments</p> <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. How do you define relapse? <p>Dr. Arun</p> <ol style="list-style-type: none"> 1. Is it a surgical plan to take Ceph 2 days after surgery? 2. How common are orthnagntic surgeries in our institution? 3. Will you require retrospective data if you don't get sufficient sample? 4. Do you have records of all orthognathic surgeries done in your institution? 5. What is the difference between your study and with key article 	Dr. Ashwathi	02:15 pm

20	<p>The Evaluation Of The Biocompatibility Of 10 Popular Orthodontic Aligners Assessed Using Bisphenol–A Release Done In Human Salivary Substitutes And Estrogenic Beta Levels Done In Cell Culture.</p> <p>IRB Comments</p> <p>Dr. Arun</p> <ol style="list-style-type: none"> 1. Modification of title needed – remove 10 popular and done in and add assessment 2. Why are 2 time points used? 3. Do you have 1 hr estimation of BPA? 4. After how long after make of aligner should you start the treatment? 5. What is the unit of estrogenic alpha and beta 6. Second part of protocol not entered. <p>Dr. Chary</p> <ol style="list-style-type: none"> 1. How BPA is released into saliva? <p>Dr. Athulya</p> <ol style="list-style-type: none"> 1. When will you check for BPA in artificial saliva 	Dr. Nooriya T K	02:30 pm
21	<p>The Evaluation Of The Biocompatibility Of 10 Popular Orthodontic Aligners Assessed Using Bisphenol–A Release Done In Human Salivary Substitutes And Estrogenic Alpha Levels Done In Cell Culture.</p> <p>IRB Comments</p> <p>Dr. Arun</p> <ol style="list-style-type: none"> 7. Modification of title needed – remove 10 popular and done in and add assessment 8. Why are 2 time points used? 	Dr. Jareena Shareef	02:45pm

	<p>9. Do you have 1 hr estimation of BPA? 10. After how long after make of aligner should you start the treatment? 11. What is the unit of estrogenic alpha and beta 12. Second part of protocol not entered.</p> <p>Dr. Chary 2. How BPA is released into saliva?</p> <p>Dr. Athulya 2. When will you check for BPA in artificial saliva</p>		
22	<p>Evaluation of the oral hygiene status, caries prevalence, overjet and traumatic injuries to anterior teeth among visually impaired individuals in 4 districts of Kerala.</p> <p>IRB Comments Dr. Vikram 1.How will you evaluate oral hygiene index? 2. Get parents' consent mandatory 3. Informed consent should include parents signature 4. Get principals permission</p> <p>Dr. Athulya 1. How will you collect the sample? 2. Modify the title</p>	Dr. Aparna K	03:00pm
23	<p>Evaluation and comparison of the sedative efficiency of intranasal Dexmedetomidine, Midazolam, Ketamine and their effect on behavior in pediatric dental patients.</p> <p>IRB Comments Dr. Vikram 1. Remove safety from primary objective</p>	Dr. Hamna	03:15pm

	<ol style="list-style-type: none">2. Your secondary objective should be your primary objective3. Why dexmedetomidine selected? <p>Dr Rosin</p> <ol style="list-style-type: none">1. How will you assess ease of treatment? <p>Dr. Arun</p> <ol style="list-style-type: none">1. Modify the research problem2. There is mix up objectives. Modify it3. Primary objective – behaviour management4. Secondary objection - ease of completion of treatment5. Do not add safety as objective6. What type of sedation will you get from all 3 medication7. Are you expecting change8. how is sample size estimated9. how will you eliminate selection bias. Modify with some kind of randomization
